Elementary Ninja Luis Estalim Guzman Gonzalez, SDGs in the Americas and Caribbean Region Walter Leal Filho, Noé Aguilar-Rivera, Bruno Borsari, Paulo R. B. de Brito, Baltazar Andrade Guerra, 2023-08-31 This volume provides an overview of the ways sustainable development issues as a whole and the SDGs in particular are perceived and practiced in a variety of countries in the Latin America and Caribbean region. It also discusses the extent to which its many socio-economic problems hinder progress towards the pursuit of a sustainable future and documents successful experiences from across the region. This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative.

The Oryx Resource Guide to El Niño and La Niña Bloomsbury Publishing, 2002-05-30 Fish die, Seagulls starve, Economies wither. And that's just in the coastal villages. El Niño, the Christ Child and its climatological opposite La Niña are global events so powerful and strange they virtually have personalities. Many remember the El Niño seasons of 1982-83 and 1997-98 which brought floods, tornadoes, droughts and snow to unusual locales. Increased study of these Tropical Pacific phenomena, also known as ENSO, the El Niño and Southern Oscillation, has now enabled scientists to predict the ENSO state as much as 12 to 18 months in advance and has helped to shape weather prediction in general. Here the basic causes and effects of El Niño and La Niña are carefully chronicled for anyone in search of accurate and current information on these natural phenomena. Chapters are devoted to the history of ENSO, its influence on global weather and on the United States, including the ecosystem and how governments and industries worldwide are utilizing new weather data to harness ENSO's economic impact rather than be saddled by it. A chronology tours key events from the 15th century diary observations of colonists in Ecuador and Peru to recent events like the devastating El Niño of 1997-98 which was responsible for 23,000 deaths and \$33 billion in damages. Biographies of important researchers, illustrations and maps and an extensive bibliography help make this a total guide to these magnificent natural cycles.

Recent Hurricane Research Anthony Lupo, 2011-04-19

This book represents recent research on tropical cyclones and their impact and a wide range of topics are covered. An updated global climatology is presented including the global occurrence of tropical cyclones and the terrestrial factors that may contribute to the variability and long-term trends in their occurrence. Research also examines long-term trends in tropical cyclone occurrences and intensity as related to solar activity while other research discusses the impact climate change may have on these storms. The dynamics and structure of tropical cyclones are studied with traditional diagnostics employed to examine these as well as more modern approaches in examining their thermodynamics. The book aptly demonstrates how new research into short-range forecasting of tropical cyclone tracks and intensities using satellite information has led to significant improvements. In looking at societal and ecological risks and damage assessment, authors investigate the use of technology for anticipating and later evaluating the amount of damage that is done to human society.

watersheds and forests by land falling storms The economic and ecological vulnerability of coastal regions are also studied and are supported by case studies which examine the potential hazards related to the evacuation of populated areas including medical facilities These studies provide decision makers with a potential basis for developing improved evacuation techniques

Managing Uncertainty in Crisis Xiaoli Lu, 2017-11-07 This book studies the variety of organizational strategies selected to cope with critical uncertainties during crises This research formulates and applies an institutional sense making model to explain the selection of strategies for coping with uncertainties during crises to answer the question why some organizations select a rule based strategy to cope with uncertainties whereas others pursue a more ad hoc based strategy It finds that the level of institutionalization does not affect strategy selection in the initial phase of responding to crises that three rigidity effects can be identified in the selection of sense making strategies once organizations have faced the failure of their selected strategies that discontinuities in the feedback loop of sense making do not necessarily move organizations to switch their sense making strategies but interact with institutionalization to contribute to switching sense making strategies This book bridges the gap between institutional thinking and crisis management theorizing A major step forward in the world of crisis management studies Professor Arjen Boin Leiden University the Netherlands In a world of increasingly complex sociotechnical systems interacting in high risk environments Professor Lu s analysis of how organizations manage uncertainty is both timely and profound Professor Louise K Comfort Director Center for Disaster Management University of Pittsburgh USA Prof Lu greatly enhances our understanding of how organizations cope with uncertainty and make sense of their challenges under the pressures of catastrophe Dr Arnold M Howitt Faculty Co Director Program on Crisis Leadership Harvard Kennedy School USA This book provides not only a theory of crisis management but also a key concept around which research and practice can be conducted Professor Naim Kapucu Director of School of Public Administration University of Central Florida USA A generic institutional model for analyzing and managing hazards disasters and crises worldwide Professor Joop Koppenjan Erasmus University Rotterdam the Netherlands This book has done an excellent job in opening the black box of how organizations make sense of the crisis situations they face and develop strategies to respond It should be read by all of us who wish for a peaceful and safe world Professor Lan Xue Dean of School of Public Policy and Management Tsinghua University China

Disaster Upon Disaster Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03 A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors risk construction complexity of resettlement and importance of peoples culture very little has become protocol and procedure Disaster Upon Disaster illuminates the numerous disjunctions between the suppositions realities agendas and executions in the field goes on to detail contingencies predicaments old and new plights and finally advances solutions toward greatly improved outcomes

Powerless Diana Hernández, Jennifer Laird, 2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy's availability a family's living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In *Powerless* sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernández and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems They are often forced to make difficult choices about what bills to pay These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernández and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources *Powerless* creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality

Hurricane Maria in Puerto Rico Alberto Dávila, Marie T. Mora, Havidán Rodríguez, 2021-09-30 With its 155 mile per hour sustained windspeeds the near Category 5 Hurricane Maria brought catastrophic devastation and destruction as it diagonally crossed the Commonwealth of Puerto Rico from the southeast to the northwest on September 20 2017 The official death toll estimate of 2 975 lost lives means this record storm became one of the most devastating hurricanes not only for Puerto Rico but for the U S Many of these deaths as well as the prolonged human suffering were attributed to what was described as inadequate disaster response and slow restoration of basic services including running water electricity and the provision and distribution of food and medicine and not to the direct impact of the hurricane itself At the same time Hurricane Maria made landfall when Puerto Rico had been confronting a severe economic crisis surging for over a decade This crisis referred to as La Crisis Boricua was characterized by a

significant loss of industry and jobs a deteriorating infrastructure record net outmigration a shrinking and rapidly aging population rising healthcare under coverage a bankrupt government and federal legislation restricting fiscal policy decisions made by elected officials on the island Thus Hurricane Maria exacerbated the effects of La Crisis Boricua on the socioeconomic health and demographic outcomes affecting Puerto Ricans on the island and U S mainland Bringing together scholars from a wide variety of disciplines including economics sociology demography health psychology disaster research political science education the arts and others this volume represents one of the first interdisciplinary sets of studies dedicated to analyzing the effects of Hurricane Maria on island and stateside Puerto Ricans Specific topics cover Hurricane Maria s impact on labor market outcomes including wages and employment by industry health implications including mental health changes in artistic expression civic engagement and disaster response and recovery A common thread through many of the chapters was the destruction of Puerto Rico s electrical grid and the prolonged restoration of electricity and other essential services that resulted in the loss of thousands of lives

Climate Change, Public Health, and the Law Michael Burger, Justin Gundlach, 2018-10-25 Presents comprehensively the currently un mapped constellation of issues related to climate change public health and the law

Climate Changed Mara Freilich, Irmak Turan, Jessica Varner, Lizzie Yarina, 2025-07-15 Models change our worlds From global carbon flux models to regional coastal flood prediction maps climate related models influence how we know our environment how we build our cities and how we act on a climate altered planet Yet such models typically require specialized knowledge to navigate and because the climate crisis is inherently multidimensional technical expertise in isolation is not enough *Climate Changed* examines models and their imperfect yet central role in understanding the relationship between global climate dynamics and the human built environment It compares and synthesizes the methods and function of models in disciplines ranging from architecture and planning to climate science and natural hazards research This book considers how disparate models are woven together to understand the climate crisis underscoring the necessity of combining locally situated and transdisciplinary knowledge with climate science to navigate current and future cataclysmic changes It highlights the challenges and consequences of disciplinary boundaries siloed scientific knowledge and uneven data and develops ways to overcome these limitations As the world faces the effects of climate change climate scientists are debating the future of their field architects engineers and planners are designing in the context of climate change and society at large is grappling with how to take action This book brings those communities together to chart a path forward

Sea of Storms Stuart B. Schwartz, 2016-07-26 A panoramic social history of hurricanes in the Caribbean The diverse cultures of the Caribbean have been shaped as much by hurricanes as they have by diplomacy commerce or the legacy of colonial rule In this panoramic work of social history Stuart Schwartz examines how Caribbean societies have responded to the dangers of hurricanes and how these destructive storms have influenced the region s history from the rise of plantations to slavery and its abolition to migrations racial conflict and war Taking readers

from the voyages of Columbus to the devastation of Hurricane Katrina Schwartz looks at the ethical political and economic challenges that hurricanes posed to the Caribbean s indigenous populations and the different European peoples who ventured to the New World to exploit its riches He describes how the United States provided the model for responding to environmental threats when it emerged as a major power and began to exert its influence over the Caribbean in the nineteenth century and how the region s governments came to assume greater responsibilities for prevention and relief efforts that by the end of the twentieth century were being questioned by free market neoliberals Schwartz sheds light on catastrophes like Katrina by framing them within a long and contentious history of human interaction with the natural world Spanning more than five centuries and drawing on extensive archival research in Europe and the Americas *Sea of Storms* emphasizes the continuing role of race social inequality and economic ideology in the shaping of our responses to natural disaster

Energy Production in the Mississippi River Delta J. W. Day,R. G. Hunter,H. C. Clark,2022-04-12 For nearly a century the energy industry had a profound impact on the Mississippi Delta including both the natural and socio economic systems The purpose of this book is to describe the delta how oil and gas O G activities have impacted both natural and socio economic systems and how much of the degradation could have been avoided The Mississippi Delta formed over the past six thousand years but in less than a century lost 25 percent of coastal wetlands O G activities contributed significantly to this loss O G production began in the early 20th century and over 600 conventional fields were developed Production ramped up rapidly peaking around 1970 then declined As O G production declines produced water dominates fluid production and this high salinity brine is laced with a variety of toxins Often O G was produced rapidly and much was left in the ground and is now technically and economically unavailable With careful planning this situation could have been avoided The industry also affected the regulatory framework by weakening regulations enforcement and impacts were not adequately addressed and more profits flowed out of state Thus the state was economically and environmentally worse off The industry should be compelled to contribute expertise and financial resources to restoration of the delta

Pilot study on the experiences of hurricane shelter evacuees Laura DiGrande,Lisa Carley-Baxter,Christine Bevc,Suzanne Triplett,Craig William,Lewis-Owen,Jessica Williams,2019-09-11 Community members who evacuate to shelters may represent the most socially and economically vulnerable group within a hurricane s affected geographic area Disaster research has established associations between socioeconomic conditions and adverse effects but data are overwhelmingly collected retrospectively on large populations and lack further explication As Hurricane Florence approached North Carolina in September 2018 RTI International developed a pilot survey for American Red Cross evacuation shelter clients Two instruments an interviewer led paper questionnaire and a short message service SMS text questionnaire were tested A total of 200 evacuees completed the paper survey but only 34 participated in the SMS text portion of the study Data confirmed that the sample represented very marginalized coastline residents 60 percent were unemployed 70 percent had no family or friends to stay with during

evacuation 65 percent could not afford to evacuate to another location 36 percent needed medicine medical care and 11 percent were homeless Although 19 percent of participants had a history of evacuating for prior hurricanes disasters and 14 percent had previously utilized shelters we observed few associations between previous experiences and current evacuation resources behaviors or opinions about safety This study demonstrates that for vulnerable populations exposed to storms of increasing intensity and frequency traditional survey research methods are best employed to learn about their experiences and needs
