**Hurting Memories and Beneficial Forgetting** Michael Linden, Krzysztof Rutkowski, 2013-01-07 Memories are indispensable for individuals as well as social groups Forgetting not only means loss of functioning but also loss of identity Memories can also be hurting and cause problems as research on posttraumatic stress disorders PTSD has shown This is true for individuals as well as social groups and even societies Memories and especially negative memories can escape the control of the individual Many political conflicts can only be understood when taking history and memories into account In this volume a comprehensive scientific overview is given on the development of hurting memories in individuals and societies Consequences are described i e from mental disorders in individuals like PTSD or other neurotic disorders to societal tensions and conflicts from South Africa to Northern Europe Additionally beneficial forgetting is discussed from treatments of individuals to reconciliation between social groups The contrasting of hurting memories and beneficial forgetting can help to understand that memories can have positive and negative results and that it is difficult to decide when to support memories and when forgetting Bringing individual and societal memories in coincidence the benefit is a new perspective on the interaction between individuals and society Pointing to possible negative consequences of memory the benefit is a new perspective of an important but under recognized scientific and clinical problem Presenting modes of treatment and reconciliation for individuals and social groups an overview which can't be found elsewhere
