International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process. It is comprised of two main parts: i) a technical understanding of public budgets including familiarity with government spending, tax rates and public debt, and ii) the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply side actors in the budget process (governments) simplify and disseminate budget information for demand side actors (citizens), this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes, one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth, helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development, improvement or scaling up of budget literacy initiatives.

The Political Economy of Education in South Asia John Richards, Manzoor Ahmed, Md. Shahidul Islam, 2021-12-23 With the exception of Sri Lanka, South Asian countries have not achieved quality basic education, an essential measure for escaping poverty, inequality and social exclusion. In *The Political Economy of Education in South Asia*, John Richards, Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy. *The Political Economy of Education in South Asia* documents the weak core competency reading and math outcomes in government primary schools in India, Pakistan, Bangladesh and Nepal and the consequent rapid growth of non government schools over the last two decades. It compares the training, hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland. Discussing reform options, it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework. *The Political Economy of Education in South Asia* draws on the authors' broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth.

The Hubble Space Telescope David J. Shayler, David M. Harland, 2015-11-25 The highly successful Hubble Space Telescope was meant to change our view and understanding of the universe Within weeks of its launch in 1990 however the space community was shocked to find out that the primary mirror of the telescope was flawed It was only the skills of scientists and engineers on the ground and the daring talents of astronauts sent to service the telescope in December 1993 that saved the mission For over two decades NASA had developed the capabilities to service a payload in orbit This involved numerous studies and the creation of a ground based infrastructure to support the challenging missions Unique tools and EVA hardware supported the skills developed in crew training that then enabled astronauts to complete a

demanding series of spacewalks Drawing upon first hand interviews with those closely involved in the project over thirty years ago this story explains the development of the servicing mission concept and the hurdles that had to be overcome to not only launch the telescope but also to mount the first servicing mission a mission that restored the telescope to full working order three years after its launch saved the reputation of NASA and truly opened a new age in understanding of our place in space This is not just a tale of space age technology astronauts and astronomy It is also a story of an audacious scientific vision and the human ingenuity and determination to overcome all obstacles to make it possible Hubble Space Telescope From Concept to Success is a story of an international partnership dedicated teamwork and a perfect blend of human and robotic space operations that will inspire people of all ages The subsequent servicing missions that enabled the telescope to continue its scientific program beyond its 25th year in orbit are described in a companion volume Enhancing Hubble's Vision Servicing a National Treasure

Harland, 2015-11-25 This book tells the story of the four missions to maintain Hubble's successful operation Between 1997 and 2009 these repaired serviced and upgraded the instruments on the telescope to maintain its state of the art capabilities It draws on first hand interviews with those closely involved in the project The spacewalking skills and experiences gained from maintaining and upgrading Hubble had direct application to the construction of the International Space Station and help with its maintenance These skills can be applied to future human and robotic satellite servicing and maintenance activities as well not only in Earth orbit but at locations deeper in space A companion to this book The Hubble Space Telescope From Concept

to Success relates the events of the Telescope's launch in 1990 and its rough start after a 20 year struggle to place a large optical telescope in orbit.
