

**ATTENTION**

The Corn Cracker should be removed, cleaned and prepared immediately after the main harvest.

We recommend that the Corn Cracker also be cleaned if it is not used for a couple of days, as it is possible that the rollers may stick. See chapter 6 "Maintenance – Basic machine" for detailed information.

16

Locking the Corn Cracker in position

If the Corn Cracker is not engaged to work but is still installed while the machine is in operation, it must be set in the stop position.

For this purpose use hex. bolts M12 x 30 and conical washers A 1.1.

Secure the Corn Cracker with the hex. bolts in the threaded holes at (3).

**NOTE**

The hex. hex. bolts must always be fitted in the threaded holes in order to stop them from getting filled with dirt and dust.

(Fig. 16)

17

Attaching position for discharge chute transition piece

When the Corn Cracker is engaged to work, the discharge chute transition piece can be attached to the machine at (3) with hex. bolts.

(Fig. 17)

18

Installing the discharge chute transition piece for grass harvest

A transition piece must be fitted in place of the Corn Cracker.

Place the transition piece (1) in position and fasten with retaining plates (2).

Make sure all the seals are properly fitted.

(Fig. 18)

19

Lifting the Corn Cracker out of the machine

Use a lifting beam for lifting out the Corn Cracker.

The lifting beam can be made according to the measurements as in Fig. 21.

Spring safety-hooks for attaching to the lifting beam, can be ordered as spare parts – part no. 5412-484 5.

**NOTE**

The Corn Cracker must be lifted out at an angle.

(Fig. 19)

20

The Corn Cracker can also be removed from the machine via the right-hand side door, when a suitable lifting device is available.

(Fig. 20)
