integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn t online anymore but understand that it couldn t last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected **Crystal Reports 2008 Official Guide** Neil FitzGerald,2008-10-02 CRYSTAL REPORTS 2008 OFFICIAL GUIDE Whether you re a DBA data warehousing or business intelligence professional reporting specialist or developer this book has the answers you need Through hands on examples you ll systematically master Crystal Reports and Xcelsius 2008 s most powerful features for creating distributing and delivering content One step at a time long time Crystal Reports insiders take you from the basics through advanced content creation and delivery using Xcelsius Crystal Reports Server crystalreports com and the offline Crystal Reports Viewer Every significant enhancement introduced in Crystal Reports 2008 is covered including its new visualization options and more robust Web services capabilities The book concludes by showing how to use Crystal Reports powerful NET and Java SDKs to customize and extend enterprise reporting in virtually unlimited ways Learn hands on through step by step examples and exercises and discover tips and tricks proven in real world enterprise environments Master new Crystal Reports 2008 features including interactive report viewing Xcelsius dashboarding Flex and Flash integration Report Designer improvements report bursting and more Publish professional quality reports against virtually any data source including relational and OLAP databases Universes SAP PeopleSoft JavaBeans NET COM objects XML and more Discover advanced visualization techniques using Xcelsius charts and maps Learn methods for distributing reports and integrating content into other applications Learn about the latest reporting addition to the Business Objects family Xcelsius and begin creating dynamic and interactive dashboards NEIL FITZGERALD has spent several years working at Business Objects and with one of Business Objects largest providers of custom BI and enterprise reporting solutions BOB COATES currently works as a Sales Consultant for Business Objects an SAP company where he has been employed for more than eleven years RYAN GOODMAN is the founder of Centigon Solutions Inc and remains one of the top Xcelsius experts and evangelists in the world MICHAEL VOLOSHKO is a senior presales consultant for the financial services team at Business Objects ON THE WEB Find all this and more at informit com sams Java and NET sample reports and code samples for all examples in the book Bonus chapters tips tricks and links to great reporting resources CATEGORY Database COVERS Crystal Reports 2008 Crystal Reports Server 2008 Crystal Reports Viewer crystalreports com Xcelsius 2008 USER LEVEL Beginning Intermediate *Crystal Reports 2008 For Dummies* Allen G.
