Childhood Education Olivia N. Saracho, Bernard Spodek, 1998-01-15 Play has been part of early childhood programs since the initial kindergarten developed by Friedrich Froebel more than one hundred and fifty years ago While research shows that most teachers value children's play they often do not know how to guide that play to make it more educational Too often in reflecting the value of child initiated activities teachers set the stage for children's play observe it but hesitate to intervene in that play They may fear that to intervene is to create a developmentally inappropriate set of educational practices However the lack of intervention may limit the educational outcomes of play Meanwhile a large body of research exists on different forms of children's play in educational settings that could inform teachers of young children and help them to improve their practice and support more educational play Saracho and Spodek bring together much of that research in an accessible volume for early childhood teachers and teacher educators
