turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

*The Welfare State We're In* James Bartholomew, 2013-12-16 The welfare state is one of Britain's crowning achievements Or is it In this seminal book now studied in universities in Britain and elsewhere James Bartholomew advances the sacrilegious argument that however well meaning its founders the welfare state has done more harm than good He argues that far from being the socialist utopia the post war generation dreamed of the welfare state has led to avoidable deaths in the NHS falling standards in schools permanent mass unemployment and many other unintended consequences At a deeper level he contends that the welfare state has caused millions to live deprived and even depraved lives undermining the very decency and kindness which first inspired it This landmark book changed the way many people think about the welfare state It played a major role in the political debate that led to recent reforms Now with a new introduction by the author assessing the value of these reforms this classic text still shocks with the power of its arguments and the weight of its supporting evidence

*Corporate DNA* Arnold Kransdorff, 2017-05-15 For more than half a century the developed world has been chasing productivity It's financed our wealth but that part of output on which our continued prosperity depends productivity growth is petering out The traditional scapegoat has been the dearth of worker skills But the worker skills base has never been higher The other explanation is that it is managers who are not giving full value to their employers The way they're making decisions is conferring virtually no upside potential which means they're leaving us wide open for experience poor competitors to step into our experience rich shoes Exactly as Japan did in the 1960s and the so called BRICK countries Brazil Russia India China especially China and Korea are threatening now If creeping uncompetitiveness is not to overtake us from where are the next round of productivity gains to come from Identifying some gaping holes in the way managers are taught to manage this book outlines both the size of the problem and a solution Businesses and other organizations the author says have to substantially raise the quality of their decision making For this to happen they need to be much better experiential learners And for experiential learning to take place companies and other institutions have to better manage their corporate DNA the institution specific experiences otherwise known as Organizational Memory OM which characterizes any organization's

ability to perform is the single biggest influence on decision making excellence It is a factor of production that has already been paid for at great expense yet is readily discarded in the backwash of the biggest change in workplace practice for more than a century the actively encouraged flexible labour market Corporate DNA explains why this key component of intellectual capital should be better managed can be better managed and particularly how it can be used to help organizations reduce the pandemic of repeated mistakes rei **Daily Graphic** Yaw Boadu-Ayeboafah,2003-06-03 **Current Literature** ,1951
