The Instability of Truth Rebecca Lemov,2025-03-25 An acclaimed historian of science uncovers the hidden history of brainwashing and its troubling implications for today Because brainwashing affects both the world and our observation of the world we often don t recognize it while it s happening unless we know where to look As Rebecca Lemov writes in *The Instability of Truth* Brainwashing erases itself What we call brainwashing is more common than we think it is not so much what happens to other people as what can happen to anyone *The Instability of Truth* exposes the myriad ways our minds can be controlled against our will from the brainwashing techniques used against American POWs in North Korea to the soft brainwashing of social media doomscrolling and behavior shaping In our increasingly data driven world anyone can fall victim to mind control Lemov identifies invasive forms of emotional engineering that exploit trauma and addiction to coerce and persuade in everyday life Tracing the word brainwashing from deep in the files of an operative of the U S Office of Strategic Services in the 1950s to the pioneering research of Robert Jay Lifton to the public trials of cult leaders and the case of Patty Hearst Lemov also studies how the idea of mind control has spread across the globe and penetrated courtrooms secret labs military schools and today s digital sites *The Instability of Truth* offers lessons from mind control episodes past and present Truth is always subject to question in more mundane walks of life than most people believe and Lemov equips us for the increasing challenges we face from social media AI and an unprecedented global form of surveillance capitalism *The Instability of Truth*

develops a rigorous new understanding of both brainwashing's paradoxes and its emotional roots by giving voice to brainwashers the brainwashed and third party observers alike The Perfect Bet Adam Kucharski,2016-02-23 An elegant and amusing account of how gambling has been reshaped by the application of science and revealed the truth behind a lucky bet Wall Street Journal For the past 500 years gamblers led by mathematicians and scientists have been trying to figure out how to pull the rug out from under Lady Luck In The Perfect Bet mathematician and award winning writer Adam Kucharski tells the astonishing story of how the experts have succeeded revolutionizing mathematics and science in the process The house can seem unbeatable Kucharski shows us just why it isn't Even better he demonstrates how the search for the perfect bet has been crucial for the scientific pursuit of a better world Finance for Normal People Meir Statman,2017 Finance for Normal People teaches behavioral finance to people like you and me normal people neither rational nor irrational We are consumers savers investors and managers corporate managers money managers financial advisers and all other financial professionals The book guides us to know our wants including hope for riches protection from poverty caring for family sincere social responsibility and high social status It teaches financial facts and human behavior including making cognitive and emotional shortcuts and avoiding cognitive and emotional errors such as overconfidence hindsight exaggerated fear and unrealistic hope And it guides us to banish ignorance gain knowledge and increase the ratio of smart to foolish behavior on our way to what we want These lessons of behavioral finance draw on what we know about us normal people including our wants cognition and emotions And they draw on the roles of these factors in saving and spending portfolio construction returns we can expect from our investments and whether we can hope to beat the market Meir Statman a founder of behavioral finance draws on his extensive research and the research of many others to build a unified structure of behavioral finance Its foundation blocks include normal behavior behavioral portfolio theory behavioral life cycle theory behavioral asset pricing theory and behavioral market efficiency Architecture and Movement Peter Blundell Jones,Mark Meagher,2014-12-17 The experience of movement of moving through buildings cities landscapes and in everyday life is the only involvement most individuals have with the built environment on a daily basis User experience is so often neglected in architectural study and practice Architecture and Movement tackles this complex subject for the first time providing the wide range of perspectives needed to tackle this multi disciplinary topic Organised in four parts it documents the architect's planner's or designer's approach looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it concentrates on the individual's experience and particularly on the primacy of walking which engages other senses besides the visual engages with society and social rituals and how mutually we define the spaces through which we move both by laying out routes and boundaries and by celebrating thresholds analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models drawings film and television The wide selection of contributors include academics and practitioners and discuss cases from across the US UK Europe and

Asia By mingling such disparate voices in a carefully curated selection of chapters the book enlarges the understanding of architects architectural students designers and planners alerting them to the many and complex issues involved in the experience of movement *Urgency in the Anthropocene* Amanda H. Lynch,Siri Veland,2018-11-20 A proposal to reframe the Anthropocene as an age of actual and emerging coexistence with earth system variability encompassing both human dignity and environmental sustainability Is this the Anthropocene the age in which humans have become a geological force leaving indelible signs of their activities on the earth The narrative of the Anthropocene so far is characterized by extremes emergencies and exceptions a tale of apocalypse by our own hands The sense of ongoing crisis emboldens policy and governance responses that challenge established systems of sovereignty and law The once unacceptable geoengineering technology for example or authoritarian decision making are now anticipated and even demanded by some To counter this Amanda Lynch and Siri Veland propose a reframing of the Anthropocene seeing it not as a race against catastrophe but as an age of emerging coexistence with earth system variability Lynch and Veland examine the interplay between our new state of ostensible urgency and the means by which this urgency is identified and addressed They examine how societies including Indigenous societies have understood such interplays explore how extreme weather and climate weave into the Anthropocene narrative consider the tension between the short time scale of disasters and the longer time scale of sustainability and discuss both international and national approaches to Anthropocene governance Finally they argue for an Anthropocene of coexistence that embraces both human dignity and sustainability **The Dialectical Path of Law** Charles

Lincoln,2021-10-13 This book aims to contribute a single idea a new way to interpret legal decisions in any field of law and in any capacity of interpreting law through a theory called legal dialects This theory of the dialectical path of law uses the Hegelian dialectic which compares and contrasts two ideas showing how they are concurrently the same but separate without the original ideas losing their inherent and distinctive properties what in Hegelian terms is referred to as the sublation To demonstrate this theory Lincoln takes different aspects of international tax law and corporate law two fields that seem entirely contradictory and shows how they are similar without disregarding their key theoretical properties Primarily focusing on the technical rules of the Organisation for Economic Co operation and Development OECD approach to international tax law and the United States approach to tax law Lincoln shows that both engage in the Hegelian dialectical approach to law *Internet Science* Sotiris Diplaris,Anna Satsiou,Ashbjørn Følstad,Michail Vafopoulos,Thomas

Just Financial Markets? Lisa Herzog,2017-04-05 Well functioning financial markets are crucial for the economic well
being and the justice of contemporary societies The Great Financial Crisis has shown that a perspective that naively trusts in
the self regulating powers of free markets cannot capture what is at stake in understanding and regulating financial markets
The damage done by the Great Financial Crisis including its distributive consequences raises serious questions about the
justice of financial markets as we know them This volume brings together leading scholars from political theory law and
economics in order to explore the relation between justice and financial markets Broadening the perspective from a purely
economic one to a liberal egalitarian one the volume explores foundational normative questions about how to conceptualize
justice in relation to financial markets the biases in the legal frameworks of financial markets that produce unjust outcomes
and perspectives of justice on specific institutions and practices in contemporary financial markets Written in a clear and
accessible language the volume presents analyses of how financial markets should function and how the Great Financial
Crisis came about proposals for how the structures of financial markets could be reformed and analysis of why reform is not
happening at the speed that would be desirable from a perspective of justice **Digital Forensics and Cyber Crime**
