Sustainable Development in EU Foreign Investment Law Stefanie Schacherer,2021-08-24 In Sustainable Development in EU Foreign Investment Law Stefanie Schacherer offers an account of the legal effects of sustainable development within the EU s international investment policy and global investment governance The author provides a clear assessment of how the EU contributes to the ongoing debate on sustainable development integration in international investment agreements By analysing the EU s post Lisbon treaty practice the author critically assesses to what extent the EU has managed to operationalise a sustainable development driven foreign investment policy **Freezing Injunctions in Private International Law** Filip Šaranović,2022-10-27 The extent of available pre judgment asset preservation relief is

widely regarded as a unique characteristic of English law and one of the key factors attracting international commercial litigation to the English courts By taking a novel view of the theoretical foundations of a freezing injunction this book challenges the long established view that such an injunction is an in personam form of relief whose sole purpose is to prevent unscrupulous defendants from making themselves judgment proof Dr aranovi combines historical and comparative perspectives to identify several theoretical flaws in the court s jurisdiction to grant this popular form of interim relief The book demonstrates that the current application of private international law rules in this field leads to inequality among litigants and illegitimate encroachment upon the sovereignty of foreign states It proposes a range of possible solutions to alleviate concerns about the scope of freezing injunctions both in the domestic and international arena *Australasian*

experiences Protecting National Security Phil Glover, 2021-07-27 This book contends that modern concerns surrounding the UK State's investigation of communications and more recently data whether at rest or in transit are in fact nothing new. It evidences how whether using common law, the Royal Prerogative or statutes to provide a lawful basis for a state practice traceable to at least 1324, the underlying policy rationale has always been that first publicly articulated in Cromwell's initial Postage Act 1657, namely the protection of British national security broadly construed. It further illustrates how developments in communications technology led to Executive assumptions of relevant investigatory powers administered in conditions of relative secrecy. In demonstrating the key role played throughout history by communications service providers, the book also charts how the evolution of the UK Intelligence Community, entry into the UKUSA communications intelligence sharing agreement 1946 and intelligence community advocacy all significantly influenced the era of arguably disingenuous statutory governance of communications investigation between 1984 and 2016. The book illustrates how the 2013 Intelligence Shock triggered by publication of Edward Snowden's unauthorized disclosures impelled a transition from Executive secrecy and statutory disingenuousness to a more consultative, candid Executive and a policy of transparent secrecy now reflected in the Investigatory Powers Act 2016. What the book ultimately demonstrates is that this latest comprehensive statute, whilst welcome for its candour, represents only the latest manifestation of the British state's policy of ensuring protection of national security by granting powers enabling investigative access to communications and data in transit or at rest, irrespective of location.

PMI-PBA® Exam Practice Test and Study Guide Brian Williamson, 2017-11-07 The PMI PBA Exam Practice Test and Study Guide attempts to address all your questions and concerns by providing two of the most sought-after study aids: memory maps and practice questions. The systematic use of memory maps helps aid in the efficient recall of information and can boost confidence during the exam. Well-crafted practice questions are fantastic study aids that can be used to track your progress as you learn new concepts, introduce you to the complex sentence structure that is likely to appear on the exam, and concentrate your studies by domain, essentially preparing you to pass the very challenging PMI PBA Exam in the allotted four hours. In addition to study hints and exam topics, this book provides references to tools and techniques that should be incorporated into your work immediately. For each of the five domains outlined in the PMI Professional in Business Analysis (PMI PBA) Examination Content Outline 2013, the ECO, twenty practice questions test your knowledge. Also included is a challenging 200-question practice exam which is representative of the actual exam. To enhance your studies, a timed online simulated exam is also provided. At the end of the simulated exam, you can see your score per the number of questions you answered correctly. These exam questions are crafted to foster learning and reinforce content; they are not obscure or overly complicated but rather are representative of the actual exam. Knowing what to do must be translated into doing what you know. This book helps you prepare for the PMI PBA exam by instilling knowledge and encouraging critical thinking. As a result, the skills attained can lead to improved project success and outcomes, and you'll

Local Theories of Argument Dale Hampe, 2021-03-25 Argumentation is

often understood as a coherent set of Western theories birthed in Athens and developing throughout the Roman period the Middle Ages the Enlightenment and Renaissance and into the present century Ideas have been nuanced developed and revised but still the outline of argumentation theory has been recognizable for centuries or so it has seemed to Western scholars The 2019 Alta Conference on Argumentation co sponsored by the National Communication Association and the American Forensic Association aimed to question the generality of these intellectual traditions This resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture Many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse Other scholars are more comfortable with the Western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances The papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship Considered together the essays do not generate one simple conclusion but they stimulate reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories

Molecular mechanisms of cellular stress responses in cancer and their therapeutic implications Megan Chircop, Daniel Speidel, 2015-03-06 In response to stress cells can activate a myriad of signalling pathways to bring about a specific cellular outcome including cell cycle arrest DNA repair senescence and apoptosis This response is pivotal for tumour suppression as all of these outcomes result in restriction of the growth and or elimination of damaged and pre malignant cells Thus a large number of anti cancer agents target specific components of stress response signalling pathways with the aim of causing tumour regression by stimulating cell death However the efficacy of these agents is often impaired due to mutations in genes that are involved in these stress responsive signalling pathways and instead the oncogenic potential of a cell is increased leading to the initiation and or progression of tumourigenesis Moreover these genetic defects can increase or contribute to resistance to chemotherapeutic agents and or radiotherapy Modulating the outcome of cellular stress responses towards cell death in tumour cells without affecting surrounding normal cells is thus one of the ultimate aims in the development of new cancer therapeutics To achieve this aim a detailed understanding of cellular stress response pathways and their aberrations in cancer is required This Research topic aims to reflect the broadness and complexity of this important area of cancer research
