Cultural Influences on the Process of Strategic Management Andreas Michael Schühly, 2022-01-01 This unique book is positioned at the crossroads of strategic management and international business Based on an in depth literature review the author empirically assesses the widely shared implicit assumption that strategic management processes can be globally applied in a standardized i.e. culture free manner So far a variety of tools have also been recommended but without incorporating cultural differences As many organizations observe that this ethnocentric view is more an illusion than reality strategic management research has started to focus on the cultural sensitivity of its theories tools and processes to provide practitioners in a multicultural setting with adequate know how and tools To foster long term decision making despite uncertainty scenario planning is frequently applied by practitioners Up until today scenario planning has however gained little attention from the academic community Through this book the author presents a newly developed framework for strategic management that combines the cultural value scale

to test the cultural sensitivity of the long term planning tool called scenario planning The different process steps of scenario planning have been individually examined for their sensitivity toward the cultural dimensions of uncertainty avoidance and long term orientation The investigation is based on a unique global set of management consultants working for a leading professional service firm The results of this research show the cultural sensitivity of scenario planning with different degrees of the process steps and the tested cultural dimensions

Synergies Created by a Strategic Fit between Business and Human Resource Strategies Wilson J. Osito Odiyo, 2013-07-26 This text is an important addition to the ongoing discourse on strategic management particularly strategic human resource management It is a result of research carried out in the agricultural sector in general and on multinational tea firms in particular The author's hands on and conceptual insights gained through nineteen years of experience across African countries make the text a useful tool for company boards of directors and strategic level managers charged with the formulation and implementation of business and human resource strategies In addition it provides justification to HR managers of the need to shift focus from primarily being concerned with routine transactional HR activities to dealing with transformational ones which are contingent on the circumstances of the organization Scholars management consultants and management students will also find the contents of this book to be of great interest and benefit It is now sufficiently recognised that management has to be concerned with deliverables rather than abstractions Therefore many firms formulate and implement one form of business strategy or the other However strategies cannot be conceived let alone realised without human resource input The question that HR continues to grapple with therefore is how it can demonstrate the contribution of each employee to the bottom line and business sustainability How this question is to be answered has not always been explained and is even more crucial for the agricultural firms which are characterized by great instability in terms of weather patterns commodity prices currency exchange rates and wage levels HR planning in these circumstances cannot be a simple exercise but getting it right is more important than for organizations in more predictable environments This book moves away from the romanticization of the role of HRM in such organizations and instead provides empirical evidence of the types of business and human resource strategies employed strategic integration between these strategies and the strategic human resource management processes and practices used Finally it considers the concomitant synergies achieved by strategic fit between business and human resource strategies and their role in achieving sustainable competitive advantage

It looks instead at the latest in strategic thinking and theories and provides critical and analytical discussion as to how and if these models and theories can be applied to the industry within specific contexts such as culture, profit and non-profit organizations.
