**French Revolution**, also called **Revolution of 1789**, the revolutionary movement that shook France between 1787 and 1799 and reached its first climax there in 1789. Hence the conventional term “Revolution of 1789,” denoting the end of the ancien régime in France and serving also to distinguish that event from the later French revolutions of 1830 and 1848.

Furthermore, from about 1730, higher standards of living had reduced the mortality rate among adults considerably. This, together with other factors, had led to an increase in the population of Europe unprecedented for several centuries: it doubled between 1715 and 1800. For France, which with 26 million inhabitants in 1789 was the most populated country of Europe, the problem was most acute. A larger population created a greater demand for food and consumer goods. The discovery of new gold mines in Brazil had led to a general rise in prices throughout the West from about 1730, indicating a prosperous economic situation. From about 1770, this trend slackened, and economic crises, provoking alarm and even revolt, became frequent. Arguments for social
