

Place pan with meat in oven. Plug other end of thermometer into outlet at left side of large oven as shown.

Turn white pointer to white dot beside the type of meat to be cooked. This automatically dials the proper internal temperature at the top of the dial. Or, just turn white pointer to the desired temperature.

Turn oven Control to 325° or the setting you prefer for roasting.

Red indicator will move up during roasting, showing internal temperature of the meat. When the internal temperature reaches setting selected the signal will buzz insistently. To stop signal, turn white pointer to OFF. Now your roast is done to perfection and ready to serve!

NOTE:

After using, wipe thermometer with warm, sudsy cloth and dry. DON'T STORE IN OVEN!
