

## Student Guide to the Frog Dissection

### Dissection Instructions

1. Place the frog in the dissecting pan ventral side up.
2. Use scissors to lift the abdominal muscles away from the body cavity. Cut along the midline of the body to the forelimbs.
3. Make transverse (horizontal) cuts near the arms and legs.
4. Lift the flaps of the body wall and pin back.

\*If your specimen is a female, the body may be filled with eggs. You may need to remove these eggs to view the organs.

Locate each of the organs below. Check the box to indicate that you found the organs.

1. **Fat Bodies** --Spaghetti shaped structures that have a bright orange or yellow color, if you have a particularly fat frog, these fat bodies may need to be removed to see the other structures. Usually they are located just on the inside of the abdominal wall. ☐
2. **Peritoneum** A spider-web like membrane that covers many of the organs; you may carefully pick it off to get a clear view ☐
3. **Liver**--The largest structure of the the body cavity. This brown colored organ is composed of three lobes. The **right lobe**, the **left anterior lobe**, and the **left posterior lobe**. The liver is not primarily an organ of digestion, it does secrete a digestive juice called bile. Bile is needed for the proper digestion of fats. ☐
4. **Heart** - at the top of the liver, the heart is a triangular structure. The **left and right atrium** can be found at the top of the heart. A single **ventricle** located at the bottom of the heart. The large vessel extending out from the heart is the **conus arteriosis**.☐

## **Frog Dissection Student Guide:**

**Laboratory Guide for the Study of the Frog** Bertram Garner Smith, 1917      A Laboratory Guide to Frog Anatomy Eli C. Minkoff, 2013-10-22 A Laboratory Guide to Frog Anatomy is a manual that provides essential information for dissecting frogs. The selection provides comprehensive directions along with detailed illustrations. The text covers five organ systems: namely skeletal, muscular, circulatory, urogenital, and nervous system. The manual also details a frog's major external and internal features. The book will be of great use to students and instructors of biology-related laboratory courses.      *The Student's Manual of Comparative Anatomy, and Guide to Dissection* G. Herbert Morrell, 2023-04-13 Reprint of the original first published in 1872. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.      The Student's Manual of Comparative Anatomy and Guide to Dissection George Herbert Morrell, 1872

**Carolina Science and Math** Carolina Biological Supply Company, 2003      *Laboratory Guide to Vertebrate Dissection for Students of Anatomy* Arthur Beeny Appleton, 1929 As its title indicates, this is a book for use in a practical comparative anatomy course. It is intended for a somewhat unusual class of student and consequently its contents, outlook, and method of treatment are unlike those of the standard texts in this subject. As stated in the preface, it is assumed that the student has already done a course in elementary zoology including the usual vertebrate types and has also examined in more detail a mammal. Unless this mammal were man, a number of comparisons in the book would be missed. To obtain full benefit from it, the student should obviously have taken the preliminary medical studies including a fair amount of human anatomy. This is not meant to imply that the student of advanced zoology cannot get many useful hints and fresh points of view from its pages; he undoubtedly can. The types treated in a series of regional dissections are the lamprey, the dogfish, *Squalus Necturus*, the lizard, and the dog. As it is intended for assistance in dissection, information regarding osteology and the details of the central nervous system have been purposely omitted, and conversely the muscles are treated somewhat more fully than is customary.

Koehler, Punya Mishra, Published by The AACTE Committee on Innovation and Technology, 2014-06-11 Published by Taylor Francis Group for the American Association of Colleges for Teacher Education.
