adults to teach girls about money and for girls to do some learning on their own Women earn 78 cents on the dollar on average compared to men in America despite decades of fighting for wage equality And while it is true that women have significantly more opportunities for earning than in past eras this improved ability for women to determine their own financial future makes it more important that girls understand the strategies for financial success Financial Nutrition for Young Women How and Why to Teach Girls about Money addresses the two critical levels that are necessary to truly eradicate women's economic inequality what to teach girls and what women need to learn Authored by a financial educator who is also a mother and a teacher this book is for people who care about teenage girls parents and other family members educators financial advisors troop leaders camp directors and community organization leaders The talking points and independent activities are easily accessible and engaging for both adults and students Financial Nutrition for Young Women How and Why to Teach Girls about Money can be used effectively in the home the classroom afterschool programs clubs and camps as well as in girls organizations It can also be a resource to women who want to better understand how to empower themselves financially

**Science and Ideology in the Policy Sciences** Paul Diesing, 2017-07-05 The purpose of this book is to examine how ideology operates in the sense of influencing the conduct of inquiry in the policy sciences defined as economics political science and sociology The author seeks to identify the main ideologies and show how each ideology produces a preference for certain problems methods and hypotheses how it sensitizes scientists to certain phenomena and suggests certain interpretations of those phenomena and how it closes off other phenomena and concepts from investigation and testing or at least distorts that investigation In this book Diesing critically examines all the major schools of policy related social thought from 1930 to 1975 He deals with Neoclassical Economics and its various applications the Keynesians the Systems Approach the Schumpeter perspective the Critical Intellectuals the Pluralists the J K Galbraith School New Left Marxism and the Ecological Paradigm of Schumacher and others The world looks different if your perspective is that of a rational small businessman working in a society of hypothetical perfect competition as opposed to that of a proletarian looking up at your oppressors Part One is descriptive and evaluative considering each ideology in turn Part Two considers the policy implications In 1982 Diesing published a remarkable book entitled Science and Ideology in the Policy Sciences When I interviewed Diesing in Buffalo in the summer of 1984 he told me that to date the publication had been reviewed in only two professional journals I was astounded Science Ideology was the best book I had read in a decade and it related directly to all the policy sciences The lack of professional response may partially reflect Diesing's disinterest in self promotion but beyond this is the community problem Scholars are recognized within disciplines but there is only a tiny community of social science I consider this to be the most brilliant of Diesing's books Like all of Diesing's works it remains highly relevant today from the introduction by Richard Hartwig
