

The background of the image is a composite. At the top, a large, ethereal eye with a blue iris is superimposed over a dark, swirling blue and green pattern. Below this, a sun-dappled forest path leads into the distance. Four women, the members of Celtic Woman, are positioned along this path. From left to right: the first woman has dark hair and wears a light blue dress; the second has blonde hair and wears a vibrant blue dress; the third has dark hair and wears a white dress; the fourth has blonde hair and wears a light blue dress while playing a violin. The overall mood is magical and mystical.

Building Guderian's Duck: Germany's Response To The Eastern Front Antitank Crisis, 1941 To 1945 L-Cmdr

Scott M. Chafian, 2014-08-15 The appearance of the T 34 in 1941 caused a crisis for German antitank forces Existing antitank guns were nearly impotent against the new Russian tank while anti-aircraft and artillery pieces though successful when pressed into action were insufficiently mobile to accompany mechanized forces The German Army Ordnance Office the Heereswaffenamt was responsible for development of new weapons and would be responsible for countering the threat of Russian armor The Heereswaffenamt would need to not only counter the T 34 but also do so in an environment of shifting political relationships and with an increasingly stressed industrial system Utilizing lessons from the bitterly contested battlefields of western Russia the Heereswaffenamt developed a tank destroyer the Jagdpanzer IV using the existing chassis of the Panzer IV tank and the guns of both the Panzer IV and Panther tanks The Jagdpanzer IV known by its crews as Guderian's Duck proved to be a capable tank killer against both the T 34 threat of 1941 and 1942 as well as the improved versions of 1943 and 1944 **The Official Index to The Times**, 1915 **The Forgotten Front** Gerhard P. Gross, 2018-09-28

Although much has been written about the Western Front in World War I little attention has been given to developments in the east especially during the crucial period of 1914-1915 Not only did these events have a significant impact on the fighting and outcome of the battles in the west but all the major combatants in the east ultimately suffered collapses of their political systems with enormous consequences for the future events Available for the first time in English this seminal study features contributions from established and rising scholars from eight countries who argue German central and eastern European perspectives Together they illuminate diverse aspects of the Great War's Eastern Theater including military strategy and combat issues of national identity formation perceptions of the enemy and links to World War II They also explore the experiences of POWs and the representation of the Eastern Front in museums memorials and the modern media The scholarship on the First World War is dominated by the trauma of the modern technologized war in the west causing the significant political events and battles on the Eastern Front to shift to the background The Forgotten Front illuminates overlooked but vital aspects of the conflict and will be an essential resource for students and scholars seeking to better understand the war and its legacy *Routledge Library Editions: Phonetics and Phonology* Various, 2021-07-14

This set of 23 volumes originally published between 1952 and 1996 amalgamates a wide breadth of research on the subject of phonetics and phonology including studies on the axiomatic method nonlinear phonology and prosodic phonology This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of language and linguistics *Tank Warfare on the Eastern Front, 1941-1942* Robert Forczyk, 2014-02-24 The author of *Case White: The Invasion of Poland* delves into the strategy and weaponry of armored warfare during the early years of the Russo-German War The German panzer armies that swept into

the Soviet Union in 1941 were an undefeated force that had honed their skill in combined arms warfare to a fine edge. The Germans focused their panzers and tactical air support at points on the battlefield defined as *Schwerpunkt*, main effort to smash through any defensive line and then advance to envelope their adversaries. Initially these methods worked well in the early days of Operation Barbarossa and the tank forces of the Red Army suffered defeat after defeat. Although badly mauled in the opening battles, the Red Army's tank forces did not succumb to the German armored onslaught and German planning and logistical deficiencies led to over extension and failure in 1941. In the second year of the invasion the Germans directed their *Schwerpunkt* toward the Volga and the Caucasus and again achieved some degree of success but the Red Army had grown much stronger and by November 1942 the Soviets were able to turn the tables at Stalingrad.

Robert Forczyk's incisive study offers fresh insight into how the two most powerful mechanized armies of the Second World War developed their tactics and weaponry during the critical early years of the Russo German War. He uses German, Russian and English sources to provide the first comprehensive overview and analysis of armored warfare from the German and Soviet perspectives. His analysis of the greatest tank war in history is compelling reading. Includes photos.

Rhinology and Facial Plastic Surgery

Georg von Békésy was awarded the Nobel Prize for his seminal work on hearing. It was however 43 years later in 2004 that a common scientific language that is spoken uniformly by Linda Buck and Richard Axel was awarded the Nobel Prize for and consistently all over the world. Universality so that norms their work on olfaction. This is indicative of how the science of staging systems etc can be applied anywhere in the world with rhinology is only now coming into its own. For quite some time equal validity. This can only be achieved through consensus. Rhinology was thought to be limited in scope. It is now appreciated that the nose is not only an organ of aesthetic appeal but rhinologic disease but also what all surgeons want and that is one that carries out several important complex functions. The operative steps to bring about successful resolution of disease. A tremendous surge in medical literature in recent times bears witness to the return of normal function.

War DK Publishing, 2009-10-01

War has been central to the rise and fall of civilizations since the dawn of time. The history of warfare first emerges from legend in Mesopotamia, the cradle of civilization around 3 000 years before the birth of Christ. The first armies that we know about fought in Sumeria, Ancient Egypt and Syria. From these first battles fought with spears or axes on horseback or on foot, War traces the campaigns and conflicts that have shaped world history and examines the evolution of military tactics and technology. The story of the development from these primitive battles to the global conflicts of the 20th century and the modern War on Terror is the story of humanity itself reflecting the same political, cultural and technological forces that have defined human history. From longbows to laser guided missiles, from chariots to jet aircraft and from Samurai warriors to SAS soldiers, War provides the definitive visual chronicle of this intense, brutal and often heroic tale. War combines

a coherent and compelling spread by spread historical narrative with a wealth of supporting features on weapons and technology strategy and tactics the experience of war and history s fighting elites to recount the epic 5 000 year story of warfare and combat through the ages
