The Road To Excellence K. Anders Ericsson, 2014-03-05 Excellence and the highest levels of performance in the arts and sciences sports and games have always been an object of fascination to both scientists and lay people Only during the last 20 years have scientists studied these levels of performance in the laboratory in order to identify their mediating mechanisms Contrary to the common belief that innate talents are the

critical factors for exceptional performance investigators have found that acquired skills knowledge and physiological adaptations in response to intense practice are the primary mechanisms mediating the highest levels of performance This is the first and only book to examine how elite performers effect their exceptional accomplishments The world s leading researchers on expert performance and creative achievement review theories and recent findings from many different domains of expertise on how experts optimize improvement in their performance and eventually attain excellence Elite performers are shown to have engaged in deliberate practice activities specifically designed to improve their performance from an early age By age 20 they have often accumulated over 10 000 hours of practice The essential elements of deliberate practice such as specific goals to improve performance successive refinement through repetition feedback and instruction are explicated for different domains Although the content of practice tasks will necessarily differ from domain to domain investigators have found invariant characteristics for the optimal duration of practice sessions maximal amounts of daily practice the length of intense preparation around 10 years and ages of peak performance Some of the book s chapters extend the review to the acquisition of everyday life skills such as reading to the performance of teams of experts and to the development of creative achievement geniuses and artistic child prodigies The book concludes with commentaries by several outstanding scientists in psychology education and history of science who discuss the generalizability of presented ideas and raise issues for future issues EXTRA COPY It could be said that striving for excellence is what characterizes humanity or perhaps what characterizes humanity at its best Why do so few individuals ever reach the highest levels when so many start out on the Road to Excellence In this book the world s foremost researchers of expert performance in domains as diverse as sports medicine chess and the arts explore the similarities and differences in the extended and strenuous Road to Excellence taken by the successful individuals in each domain Their findings will intrigue and inspire readers who are themselves driven to achieve or who simply want to better understand the processes involved Well Played, Grades 3-5 Linda Dacey, Karen Gartland, Jayne Bamford Lynch, 2023-10-10 Students love math games and puzzles but how much are they really learning from the experience Too often math games are thought of as just a fun activity or enrichment opportunity Well Played Grades 3 5 Building Mathematical Thinking Through Number Games and Puzzles shows you how to make games and puzzles an integral learning component that provides teachers with unique access to student thinking The twenty five games and puzzles in Well Played Grades 3 5 which have all been field tested in diverse classrooms contain Explanations of the mathematical importance of each game or puzzle and how it supports student learning Variations for each game or puzzle to address a range of learning levels and styles Classroom vignettes that model how best to introduce the featured game or puzzle The book also includes a separate chapter with suggestions for how to effectively manage games and puzzles in diverse classrooms game boards game cards and puzzles assessment ideas and suggestions for online games puzzles and apps Well Played Grades 3 5 will help you tap the power of games and puzzles to engage students in sustained and
