Maynard,Jason Turowetz,2022-05-25 As autism has become a widely prevalent diagnosis we have grown increasingly desperate to understand it Whether through baseless blame on vaccination or struggles to determine the potential genetic origins of autism Americans have devoted a great deal of thought to what autism is and where it comes from In *Autistic Intelligence* Douglas Maynard and Jason Turowetz focus on a different origin of autism the diagnostic process By turning to diagnosis they ask us to begin with the basic questions of what norms we measure autistic behavior against why we understand autistic behavior as disordered and how we go about assigning that disorder to particular people The authors take a close look at a clinic in which children are assessed for and diagnosed with autism They spent hours in assessment evaluations with psychologists pediatricians parents and children and the resulting data enabled them to make plain the systems language and categories that clinicians rely upon when making their assessments Those diagnostic tools determine the kind of information doctors can gather about children and indeed those assessments affect how children act Autism is not a stable category they show but the result of an interpretive act And in the process of diagnosing children with

autism they argue we miss all of the unique contributions they make the world around them

Twice Exceptional Scott Barry Kaufman, 2018 In an educational system founded on rigid standards and categories students who demonstrate a very specific manifestation of intelligence flourish while those who deviate tend to fall between the cracks Too often talents and interests that do not align with classroom conventions are left unrecognized and unexplored in children with extraordinary potential but little opportunity For twice exceptional 2e children who have extraordinary strengths coupled with learning difficulties the problem is compounded by the paradoxical nature of their intellect and an unbending system ill equipped to cater to their unique learning needs Twice Exceptional Supporting and Educating Bright and Creative Students with Learning Difficulties provides cutting edge evidence based approaches to creating an environment where twice exceptional students can thrive Viewing the 2e student as neither exclusively disabled nor exclusively gifted but rather as a dynamic interaction of both leading experts offer holistic insight into identification social emotional development advocacy and support for 2e students With chapters focusing on special populations including autism dyslexia and ADHD as well as the intersection of race and 2e this book highlights practical recommendations for school and social contexts In expounding the unique challenges faced by the 2e population Twice Exceptional makes a case for greater flexibility in our approach to education and a wider notion of what it means to be academically successful

BOOK JACKET

Autistic Spectrum Disorders in the Secondary School Lynn Plimley, Maggie Bowen, 2006-04-24 I liked the way it dealt with the difficult issues such as mental health sexuality and future employment in a clear and direct way providing well thought out practical responses Easy to read yet informative Very accessible in an area of SEN that is now a key area of concern Captivating good presentation with the case studies reflective oasis and points to remember Very useful for Sencos and teachers Judging Panel for NASEN TES Book Award There can be no doubt that the action suggested by the authors to improve outcomes for pupils with ASD would benefit the inclusion of all pupils Special Needs Information Press The book gives a clear insight into some of the issues which are important from the perspective of the pupil the challenges they face and the behaviours that can result It openly addresses the impact of these behaviours on a school and offers clear guidance and strategies The options given are realistic practical and achievable and the Reflective Oasis sections offer an ideal starting point for self evaluation and staff training Mike Ridout Head of Access and Inclusion Service Bridgend LEA All those involved in education at secondary level including senior managers and governors will find this concise book informative in helping them to understand the needs of their pupils with ASD Ian Attfield Advisory Teacher ASD Birmingham Specialist Support Service The book not only gives sound advice it helps the reader to find a wider range of sources of support and information a useful practical guide that makes the organisation of inclusive education achievable Special The book does

have a number of useful strategies and tips but it provides more than just a list of practical points Support staff are encouraged to reflect upon their own practice and that of their school The book is well worth buying and should appeal both to support workers and their managers Support For Learning The book fills a niche by distilling and providing information to busy teachers an important little book that is quite readable and may be very useful to its intended audience American Psychological Association When a young person with autistic spectrum disorders enters secondary school there are lots of new factors to consider This books looks at making good transitions from primary school how to provide helpful INSET for colleagues including teachers senior managers support staff and lunchtime supervisors using a special interest as a tool for learning record keeping IEPs and sharing information across the school subject disapplication and formal examinations social strategies to employ in a large high school useful tips for staff what to do and what not to do work experience careers and self advocacy The importance of working closely with parents is also covered as is dealing with challenging behaviour the book not only gives sound advice it helps the reader to find a wider range of sources of support and information The authors have not sought to minimise the difficulties or to pretend that schools and individuals will not have to change or adapt nor have they avoided difficult questions What they have one is to write a useful practical guide that makes the organisation of inclusive education achievable Resource File *Learning and Behavior Problems in Asperger Syndrome* Margot Prior, 2004-08-05 This volume provides research based practical information on managing the challenges that Asperger syndrome AS presents in everyday life and in the classroom Current knowledge is reviewed on the core learning behavioral emotional social and communication difficulties associated with this complex disorder Hurdles facing children with AS and their parents and teachers are clearly identified and effective assessment and intervention approaches described Special features include firsthand accounts from an adult with AS and a teacher with extensive experience in the area as well as numerous illustrative vignettes and classroom examples While written primarily for professionals the volume will also be of interest to many parents Good Reasons for Bad Feelings Randolph M. Nesse, MD, 2019-02-12 A founder of the field of evolutionary medicine uses his decades of experience as a psychiatrist to provide a much needed new framework for making sense of mental illness Why do I feel bad There is real power in understanding our bad feelings With his classic *Why We Get Sick* Dr Randolph Nesse helped to establish the field of evolutionary medicine Now he returns with a book that transforms our understanding of mental disorders by exploring a fundamentally new question Instead of asking why certain people suffer from mental illness Nesse asks why natural selection has left us all with fragile minds Drawing on revealing stories from his own clinical practice and insights from evolutionary biology Nesse shows how negative emotions are useful in certain situations yet can become overwhelming Anxiety protects us from harm in the face of danger but false alarms are inevitable Low moods prevent us from wasting effort in pursuit of unreachable goals but they often escalate into pathological depression Other mental disorders such as addiction and anorexia result from the mismatch between modern environment

and our ancient human past And there are good evolutionary reasons for sexual disorders and for why genes for schizophrenia persist Taken together these and many more insights help to explain the pervasiveness of human suffering and show us new paths for relieving it by understanding individuals as individuals

Touching the Future Technology for Autism? J. Mintz,M. Aagaard,M. Gyori,2012-12-05 International interest in the use of assistive and ambient

information and communication technologies to support people with a range of cognitive impairments is growing rapidly. Autism spectrum disorders (ASDs) which affect social skills, communicative abilities and behavior are of particular interest. The number of diagnosed cases has continued to grow in recent decades and the impairments associated with ASDs mean individuals affected are at risk of social isolation and marginalization. Although helping people with autism to overcome their difficulties has always required the joint expertise of various fields, the widely shared view is that innovative ICT may hold the key to more efficient support and intervention in the near future. This book summarizes the results and conclusions of HANDS, an international research and development project supported by the 7th Framework Programme of the European Commission. The aim of the HANDS project was to develop and test a smartphone based cognitive support system for intellectually able young people with ASDs with a focus on use in secondary school environments. The results presented here include the HANDS system, a partly mobile partly web based cognitive support system based on principles of Persuasive Design, a unique multi mode research methodology applying both various quantitative and qualitative techniques to test the applicability and efficiency of the system, an exploration of relevant conceptual issues from the point of view of Persuasive Design and its philosophical foundations, a mapping of key ethical issues related to developing and applying mobile ICT for individuals with autism and other cognitive impairments. The experiences of teachers who implemented the system in school environments are also summarized. These results can be seen as snapshots of an evolutionary process but the conclusions drawn here are significant for future developments with mobile assistive technology for people with ASD as well as for other conditions. The book will be of interest to professionals working with young people with ASD, human computer interaction professionals as well as others working in the broader field of mobile assistive technology.
