Ingalls, 2018-09-17 Contemporary worship music shapes the way evangelical Christians understand worship itself Author Monique M Ingalls argues that participatory worship music performances have brought into being new religious social constellations or modes of congregating Through exploration of five of these modes concert conference church public and networked congregations Singing the Congregation reinvigorates the analytic categories of congregation and congregational music Drawing from theoretical models in ethnomusicology and congregational studies Singing the Congregation reconceives the congregation as a fluid contingent social constellation that is actively performed into being through communal practice in this case the musically structured participatory activity known as worship Congregational music making is thereby recast as a practice capable of weaving together a religious community both inside and outside local institutional churches Congregational music making is not only a means of expressing local concerns and constituting the local religious community it is also a powerful way to identify with far flung individuals institutions and networks that comprise this global religious community The interactions among the congregations reveal widespread conflicts over religious authority carrying far ranging implications for how evangelicals position themselves relative to other groups in North America and beyond **Worship** Jeffrey A.
