Rent Seeking and Development Christine Ngoc Ngo, 2020-03-25 Rent seeking continues to be a topic of much discussion and debate within the political economy This new study challenges previous assumptions and sets out a new analysis of the dynamics of rent and rent seeking in development using Vietnam as a case study This book provides an alternative approach to the study of economic development and illuminates new perspectives in a contemporary context It argues that not only has there been an incomplete understanding of Vietnam's industrial development over the last three decades but that neoclassical economics do not adequately address many of the issues endangering Vietnam's development A significant observation of the Vietnamese experience is the analytical view that rents can be developmental and growth enhancing if the configuration of rent management incentivizes industrial upgrade and conditions firm performance Underlining the need to reexamine how economic actors and the state collaborate through formal and informal institutions this study fills a gap in the scholarship of the political economy of rent and rent seeking and how rents might be used for

Far Eastern Economic Review, 2002 **Vietnam: Asia's Rising Star** Brook Taylor, Sam Korsmoe, 2023-10-15 The drivers behind the world's most exciting growth story For more than 25 years Vietnam has been one of the most dynamic countries in the world in terms of GDP growth trade investment and other business metrics The key question is whether or not the country can continue this growth for another 25 years If it can Vietnam will become a high income country like South Korea and Taiwan the original Tiger Economies of Asia Engaging in conversations about Vietnam's future is challenging Locals are often too focused on the present while foreigners are caught up in legacy and political issues of the past Many observers also focus on the short term a specific economic metric or inevitably Vietnam's political system without considering the big picture or recognizing long term trends The authors researched and analyzed a broad range of drivers to assess a possible future for Vietnam and Vietnam Asia's Rising Star is the result of these efforts What Others Are Saying Vietnam Asia's Rising Star should be read by anyone with an interest in Vietnam and anyone else with an interest in the future of Asia Carlyle A Thayer professor emeritus University of New South Wales Canberra

Exploiting Linkages for Building Technological Capabilities Mai Fujita, 2014-01-10 One of the key ingredients of success in building internationally competitive industries lies in amassing a sizeable pool of competent suppliers of parts components and accessories This monograph examines how in developing countries suppliers of mechanical components at the low end of the technological trajectory build up key capabilities over time The focus is on Vietnam's motorcycle industry which was rapidly transformed from a small highly protected market to the world's fourth largest motorcycle producer This rare success resulted from intense competition between leading Japanese motorcycle manufacturers and local Vietnamese assemblers of imported Chinese components both attempting to gain supremacy in the emerging market In particular the book analyzes how local Vietnamese suppliers of motorcycle components exploited participation in contrasting types of value chains developed by the two groups of leading manufacturing firms referred to here as Japanese and or Vietnamese Chinese chains for accumulating strategic know how On the basis of historical evidence and recent empirical data collected through repeated rounds of in depth fieldwork the analysis finds first those suppliers learning trajectories evolved over time resulting in a divergence in learning performance extending across suppliers in later phases of industrial development In the later stage high performing suppliers amassed basic innovative expertise constituting the bedrock of this fast growing industry Second the analysis finds that the diverging performance can be explained by the combination of roles played by lead firms in inducing and facilitating supplier learning and those of suppliers in mobilizing their own sources of knowledge These conclusions not only provide dynamic insightful accounts of supplier learning in developing country contexts but also make key theoretical and methodological contributions to the research on value chain participation and supplier learning
