Cheremisinoff,Anton Davletshin,2015-01-28 Hydraulic fracturing commonly referred to as fracking is a technique used by the oil and gas industry to mine hydrocarbons trapped deep beneath the Earth s surface The principles underlying the technology are not new Fracking was first applied at the commercial level in the United States as early as 1947 and over the decades it has been applied in various countries including Canada the UK and Russia The author worked with engineering teams as early as the mid 1970s in evaluating ways to improve oil recovery from this practice By and large fracking was not an economically competitive process and had limited applications until the early 2000s Several factors altered the importance of this technology among them being significant technological innovations in drilling practices with impressive high tech tools for exploration well construction and integrity and recovery along with discoveries of massive natural gas reserves in the United States and other parts of the world These factors have catapulted the application of the technology to what is best described as the gold rush of the 21st century with exploration and natural gas plays proceeding at a pace that seemingly is unrivaled by any historical industrial endeavor But this level of activity has invoked widespread criticism from concerned citizens and environmental groups in almost every nation across the Globe This outstanding new volume offers the industry a handbook of environmental management practices that can mitigate risks to the environment and through best practices and current technologies to conform to the current standards and regulations that are in place to provide the world with the energy it needs while avoiding environmental damage For the new hire veteran engineer and student alike this is a one of a kind volume a must have for anyone working in hydraulic fracturing      **Industrial Hydraulics Manual** ,2015      **The Technology Teacher** ,1979      **October 2022 - Surplus Record Machinery & Equipment Directory** Surplus Record,2022-10-01 SURPLUS RECORD is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 100 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps
