Information Technology Law Ian J. Lloyd, 2014 Information Technology Law examines the national and international basis for action on such topics as data protection and computer crime The text goes on to analyse the effectiveness of current intellectual property legislation

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions

Ethical IT Innovation Sarah Spiekermann, 2015-11-18 Explaining how ubiquitous computing is rapidly changing our private and professional lives Ethical IT Innovation A Value Based System Design Approach stands at the intersection of computer science philosophy and management and integrates theories and frameworks from all three domains The book explores the latest thinking on

computer ethics inc **The Blockchain and the New Architecture of Trust** Kevin Werbach, 2023-08-15 How the blockchain a system built on foundations of mutual mistrust can become trustworthy The blockchain entered the world on January 3 2009 introducing an innovative new trust architecture an environment in which users trust a system for example a shared ledger of information without necessarily trusting any of its components The cryptocurrency Bitcoin is the most famous implementation of the blockchain but hundreds of other companies have been founded and billions of dollars invested in similar applications since Bitcoin's launch Some see the blockchain as offering more opportunities for criminal behavior than benefits to society In this book Kevin Werbach shows how a technology resting on foundations of mutual mistrust can become trustworthy The blockchain built on open software and decentralized foundations that allow anyone to participate seems like a threat to any form of regulation In fact Werbach argues law and the blockchain need each other Blockchain systems that ignore law and governance are likely to fail or to become outlaw technologies irrelevant to the mainstream economy That Werbach cautions would be a tragic waste of potential If however we recognize the blockchain as a kind of legal technology that shapes behavior in new ways it can be harnessed to create tremendous business and social value

Regional and International Cooperation in South America After COVID Melisa Deciancio, Cintia Quiliconi, 2022-07-22 This volume analyses South American regional and international cooperation during the COVID19 crisis started in 2020 Across thirteen chapters a collection of leading experts address how regional collaboration has developed evolved and recoiled The chapters explore the state of regionalism at the pandemic surge and the challenges and opportunities this situation has opened for regional and international cooperation Authors analyze the role of extra regional powers and traditional regional leaders during the pandemic identifying the extent to which regional cooperation has been possible across several policy agendas They argue that fragmented visions of regionalism ideological polarization and weak leadership has prevailed from before the pandemic which accompanied by adverse interactions among major powers has ensured that cooperation has remained bilateral rather than regional Ultimately all these factors have created a complex scenario in which disintegration dynamics have emerged darkening even more the South American regional panorama *Regional and International Cooperation in South America After COVID* will be an invaluable resource for students scholars and policy specialists of regionalism and regional integration Latin American studies international relations and international political economy *Cultural Change from a Business Anthropology Perspective* Elizabeth K. Briody, Maryann

McCabe, 2017-11-09 This book offers keen insight and useful lessons underscoring the value of practice to theory Conceived by two anthropologists who lead consulting practices McCabe and Briody selected contributors to explore how cultural change happens in a variety of consumer and organizational contexts The 12 case studies illustrate the explanatory potential and the problem solving strengths of assemblage theory and the role of human agency in provoking cultural change The case studies are compelling due to connections between the case narratives and graphics and researcher engagement in the

Factory Bruce Cannon Gibney,2019-05-14 A withering and witty examination of how the American legal system burdened by complexity and untrammelled growth fails Americans and threatens the rule of law itself by the acclaimed author of A Generation of Sociopaths Our trial courts conduct hardly any trials our correctional systems do not correct and the rise of mandated arbitration has ushered in a shadowy system of privatized justice Meanwhile our legislators can't even follow their own rules for making rules while the rule of law mutates into a perpetual state of emergency The legal system is becoming an

incomprehensible farce How did this happen In *The Nonsense Factory* Bruce Cannon Gibney shows that over the past seventy years the legal system has dangerously confused quantity with quality and might with legitimacy As the law bloats into chaos it staggers on only by excusing itself from the very commands it insists that we obey leaving Americans at the mercy of arbitrary power By examining the system as a whole Gibney shows that the tragedies often portrayed as isolated mistakes or the work of bad actors police misconduct prosecutorial overreach and the outrages of imperial presidencies are really the inevitable consequences of law's descent into lawlessness The first book to deliver a lucid comprehensive overview of the entire legal system from the grandeur of Constitutional theory to the squalid workings of Congress *The Nonsense Factory* provides a deeply researched and witty examination of America's state of legal absurdity concluding with sensible options for reform

Vulnerable Consumers and the Law Christine Riefa, Severine Saintier, 2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice through the contributions of prominent authors academic practitioners and consultants in the field of consumer law and access to justice It demonstrates that despite the development of ADR access to justice is still severely lacking for the vulnerable consumer The book highlights that a broad understanding of access to justice which encompasses good regulation and its public enforcement is an essential ingredient alongside access to the mechanisms of traditional private justice courts and ADR to protect the vulnerable consumer Indeed many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones In addition because it may contribute to pushing already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy New technologies could provide solutions The book concludes with a plea for developing inclusive justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves This book will be suitable for both students and practitioners and all those with an interest in the justice system

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living *Technological Innovation in Legacy Sectors* uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to

innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system
