STE*M: STEM Education for All Marie-Louise Botha, Hanne Deprez, Oliver Holz, Robin Schaeffer, 2025 STEM education which encompasses Science Technology Engineering and Mathematics is of paramount importance in the 21st century. Currently there is a global call for a technologically skilled workforce for the 21st century workplace related to scarce skill subjects such as Mathematics Science ICT and Arts. Furthermore these skills and jobs are not promoted effectively in wider communities. In this era of rapid technological advancements and complex global challenges including a shortage of qualified STEM educators and under resourced schools STEM education is essential. It equips individuals with critical skills for success through collaborative and interdisciplinary approaches. The asterisk in STEM reflects its evolving nature promoting interdisciplinary collaboration to develop critical skills needed in a rapidly changing technology driven world. The scope of the book is multi faceted and explores a range of practices and research contexts such as student STE M stimulated experiences transdisciplinarity diversity and inclusion in STE M education and science teaching in primary and secondary schools. The contributions show different perspectives from Belgium Botswana Germany Namibia South Africa and the United States of America

Laboratory Protocols in Applied Life Sciences Prakash Singh Bisen, 2014-02-26 As applied life science progresses becoming fully integrated into the biological chemical and engineering sciences there is a growing need for expanding life sciences research techniques. Anticipating the demands of various life science disciplines Laboratory Protocols in Applied Life Sciences explores this development. This book covers a wide spectrum of areas in the interdisciplinary fields of life sciences pharmacy medical and paramedical sciences and biotechnology. It examines the principles concepts and every aspect of applicable techniques in these areas. Covering elementary concepts to advanced research techniques the text analyzes data through experimentation and explains the theory behind each exercise. It presents each experiment with an introduction to the topic concise objectives and a list of necessary materials and reagents and introduces step by step readily feasible laboratory protocols. Focusing on the chemical characteristics of enzymes metabolic processes product and raw materials and on the basic mechanisms and analytical techniques involved in life science technological transformations this text provides information on the biological characteristics of living cells of different origin and the development of new life forms by genetic engineering techniques. It also examines product development using biological systems including pharmaceutical food and beverage industries. Laboratory Protocols in Applied Life Sciences presents a nonmathematical account of the underlying principles of a variety of experimental techniques in disciplines including Biotechnology Analytical biochemistry Clinical biochemistry Biophysics Molecular biology Genetic engineering Bioprocess technology Industrial processes Animal Plant Microbial biology.

Computational biology Biosensors Each chapter is self contained and written in a style that helps students progress from basic to advanced techniques and eventually design and execute their own experiments in a given field of biology **Daily Graphic** Ransford Tetteh,2014-03-29 *Learning Science Through Drama* Debra McGregor,Dayle Anderson,2023-01-01 This book presents a wide range of international perspectives that explore the different ways the diverse forms of drama supports learning in science It illustrates how learning science by adopting and adapting theatrical techniques can offer more inclusive ways for students to relate to scientific ideas and concepts The theatrical processes by which subject matter can be introduced thought about discussed transformed enacted and disseminated are shown to be endless The first section of the book considers different ways of theorising and applying drama in classrooms The second section provides a range of case studies illustrating how role play performance embodiment and enquiry approaches can be utilised for learning in primary secondary and tertiary education contexts The third section demonstrates how different research methods from questionnaires particular kinds of tests and even the theatrical conventions themselves can provide rich data that informs how drama impacts on learning science Future-proofing STEAME education in South Africa Rajendran Govender,Josef de Beer,Rouaan Maarman,Rajendra Chetty,2025-02-28 This book aims to contribute to the discourse of finding innovative solutions to the myriad of challenges facing science education in South Africa The book positions itself in the multi disciplinary focus on Science Technology Engineering Arts Mathematics and Entrepreneurship STEAME education rather than the traditional narrow focus on Science Technology Engineering and Mathematics STEM The chapters in the book explore the challenges and opportunities facing STEAME education in a complex 21st century and at the advent of a society with a strong artificial intelligence component in its DNA The leitmotif of the book is how engaging pedagogies could be utilised in the classroom to enhance self directed learning a sine qua non to future proof South Africa s science and technological advancement This is a book written by scholars for scholars Its target audience includes academics and researchers in the field of science education and scholars engaged with innovative teaching pedagogies particularly approaches that would enhance the achievement of learners in disadvantaged contexts The chapters in the book although eclectic in approach all contribute to the central theme of the book Most of the chapters lean on textual analyses literature reviews or concept papers which disclose new ideas before full validation **Science Education and Curriculum in South Africa** Oscar Koopman,2016-11-01 This book explores the impact of the socio historical political and economic environment in South Africa both during and after Apartheid During this time the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum The book

draws on the work of various phenomenological scholars namely Edmund Husserl Martin Heidegger Merleau Ponty and Max van Manen to discuss these tensions
