Nunes, Lisa Emelia Svensson, Anil Markandya, 2017-02-24 The transdisciplinary thematic areas of oceans management and policy require stocktaking of the state of knowledge on ecosystem services being derived from coastal and marine areas. Recently adopted Sustainable Development Goals (SDGs), especially Goals 14 and 15, explicitly focus on this. This Handbook brings together a carefully chosen set of world-class contributions from ecology, economics, and other development science and attempts to provide policy-relevant scientific information on ecosystem services from marine and coastal ecosystems, nuances of economic valuation, relevant legal and sociological response policies for effective management of marine areas for enhanced human well-being. The contributors focus on the possible nexus of science, society, and science policy with the objective of informing decision makers of the governmental agencies, business, and industry and civil society in general with respect to sustainable management of Oceans.
