Stefano Campana, Roberto Scopigno, Gabriella Carpentiero, 2016-03-31 This volume brings together all the successful peer reviewed papers submitted for the proceedings of the 43rd conference on Computer Applications and Quantitative Methods in Archaeology that took place in Siena Italy from March 31st to April 2nd, 2015. **The Handbook of Salutogenesis**

Maurice B. Mittelmark, Shifra Sagy, Monica Eriksson, Georg F. Bauer, Jürgen M. Pelikan, Bengt Lindström, Geir Arild Espnes, 2016-09-02 This in depth survey of salutogenesis shows the breadth and strengths of this innovative perspective on health promotion, health care and wellness. Background and historical chapters trace the development of the salutogenic model of health and flesh out the central concepts most notably generalized resistance resources and the sense of coherence that differentiate it from pathogenesis. From there experts describe a range of real world applications within and outside health contexts from positive psychology to geriatrics from small towns to corrections facilities and from school and workplace to professional training. Perspectives from scholars publishing in languages other than English show the global relevance of the field. Among the topics in the Handbook: Emerging ideas relevant to the salutogenic model of health; Specific resistance resources in the salutogenic model of health; The sense of coherence and its measurement; The application of salutogenesis in communities and neighborhoods; The application of salutogenesis to health development in youth with chronic conditions; The application of salutogenesis in mental health care settings. **The Handbook of Salutogenesis** summarizes an increasingly salient field for graduate and professional students of public health, nursing, psychology and medicine and for their instructors. It will also appeal to health related academicians and professionals who wish to have a thorough grounding in the topic. **Gender and Young People's Digital Sexual Cultures** Deevia Bhana, 2015-08-13 This volume focuses on the role of gender in young people's digital sexual cultures in South Africa. Offering a snapshot of their lives as they navigate the online world, this book explores young people's heterosexual desires and the materialisation of gender inequalities. The chapters in the book take heed of human and more than human elements and understand the connection between devices, technologies, images, sexting, filters, pornography, sexuality and violence as affective flows with potential for new becomings and new constraints. Chapters also detail how these experiences are woven with global and local norms regarding heterosexuality, masculinity and femininity, shaping young people's web surfing experiences amid pleasure and peril.
