

## BASIC SETUP

### Quick Arrow Rest and Nock Placement

You can quickly and easily set the position of your rest and nock point using the rest mount holes in your bow. Your rest should sit level with the two rest mount holes, or lock mount of your bow. (See graphic) When the rest placement is correct, you can begin placing the nock set. Place a nock loosely on the string and nock an arrow. Visually align the arrow level with or slightly tail high of the rest mount holes. When the correct height is set, crimp the nock set into place. This will give you a good starting point to begin tuning your bow.

### Setting The Tiller

Taking a tiller measurement allows you to check the relative tension setting of the upper and lower limbs. After setting the draw weight on your bow, you will need to check the tiller measurement to make sure that you have adjusted your limbs evenly. On all Martin compound bows, "0" or even tiller will shoot perfectly. **However, the tiller measurement can vary up to 1/4" closer at the bottom. There is no set measurement that provides peak performance for every shooter.** To measure your tiller, simply measure from the limb pockets to the string on both ends of the bow. Some shooters find that different tiller measurements from "0" work better for them. It will not hurt your bow in any way if you experiment with tiller.

***Note: Your Peep Sight position and your nock point position can change when you turn one limb bolt. Take detailed measurements and be sure that your nock and peep are correct each time you turn your limb bolts.***

### Measuring Draw Length

When your bow is at full draw, the apex of the string should be near the corner of your mouth.

Draw length can easily be measured from the apex of the string at full draw to the pivot point of the grip. **From that measurement add 1 3/4" and you will have the A.M.O. standard draw length.**

All Martin Bows are adjustable with the use of modules. Refer to the section that covers your specific cam style for instructions on adjusting draw length.
