

OPERATION OF *Martin '100'* TWIST-SHIFT CONTROL

The Twist-Shift mechanism is so designed that the motor will not shift when the speed indicator lever is to the right of the red "shift" line on the decal.

The Twist-Shift handle will turn, but it will not function when the speed indicator lever is beyond this point. This is a safety feature.

The motor cannot be shifted into "neutral" unless the speed indicator lever is to the left of the red "shift" line on the decal.

The motor may be shifted into forward or neutral as long as the speed indicator lever is left of this point.

OPERATION OF *Martin '100'* AQUAMATIC CONTROL

- 1 The Aquamatic Control button operates only when the speed indicator lever is in the upper half of the speed range.
- 2 By pressing this button, speed is reduced to $\frac{1}{2}$ full speed.
- 3 Upon releasing the Aquamatic Control button, the motor speed returns to that point at which the speed indicator lever is set in the high speed or upper range.
- 4 This device permits you to face forward and steer while you have complete control of your motor speed, and is an added safety feature.
- 5 The Aquamatic Control is non-operative when the speed indicator lever is in the lower half of the speed range.

GENERAL

By carefully following the above instructions you will have added pleasure in operating your MARTIN "100" Twist-Shift motor. The features explained on this page enable you to operate your motor more safely and with greater flexibility.

With one hand you now have complete control of speed, steering, and shifting, while facing forward.
