The One-Sex Body on Trial: The Classical and Early Modern Evidence Helen King, 2016-02-17 By far the most influential work on the history of the body across a wide range of academic disciplines remains that of Thomas Laqueur This book puts on trial the one sex two sex model of Laqueur's *Making Sex* Body and Gender from the Greeks to Freud through a detailed exploration of the ways in which two classical stories of sexual difference were told retold and remade from the mid sixteenth to the nineteenth century Agnodike the first midwife who disguises herself as a man and then exposes herself to her potential patients and Phaethousa who grows a beard after her husband leaves her are stories from the ancient world that resonated in the early modern period in particular Tracing the reception of these tales shows how they provided continuity despite considerable change in medicine being the common property of those on different sides of professional disputes about women's roles in both medicine and midwifery The study reveals how different genres used these stories changing their characters and plots but always invoking the authority of the classics in discussions of sexual identity The study raises important questions about the nature of medical knowledge the relationship between texts and observation and the understanding of sexual difference in the early modern world beyond the one sex model

Nature can be collected in many forms and shapes live animals have been locked up in cages displayed in zoos and menageries and their hides and dried body parts have been used as part of installations in galleries and studies Plants from far away countries have been cultivated in botanical gardens and in hothouses Furthermore the depiction of medicinal plants and of prized animals was regarded as an important part of the decorative schemes in an attempt to bring nature indoors Recent research has also shown that artificialia and naturalia were displayed side by side in early modern Europe sometimes in the company of scientifica and that the exhibition set up often included a complex arrangement of stables kennels aviaries art gallery and library Villas and country houses displayed favourite horses as well as paintings and antiquities Botanical gardens and gardens of simples at monastic foundations and universities imposed order and intellectual scope to the cultivation of many new species imported to Europe during the age of exploration Of particular interest to the mission of this working group is the fact that so many collections of naturalia were displayed in close proximity to other collecting categories according to a similar choreography as well as according to a similar logistical set up Thus the collections outdoors as well as indoors resemble one another in terms of labels adopted and discussions conducted on the respective merits of order and categorisation The essays in the present volume therefore connect art nature and science by tracing objects as well as the practices of collecting and display from the early kunst und wunderkammern to the more scientific aspirations and publications of the eighteenth century Indoor as well as outdoor locations of collecting are considered as well as the dissemination of objects and knowledge in the form of books during a period which gradually led

from an intrinsic if untidy connection between art and nature towards a new world of clear if unhappy divisions
