**Meaninglessness** M. A. Casey,2002-01-01 What would the world be like if we no longer needed meaning Australian

sociologist Michael Casey's revealing work charts the collapse of the metaphysical world and the innate human need for meaning. With the decline of Christianity and the demise of secular universalism in the west, the meaning and value of metaphysical culture has been replaced by an entirely new post metaphysical world. In *Meaninglessness*, Casey revisits the social theory of Nietzsche, Freud, and Rorty in order to conceive how this post metaphysical culture may take shape in the third millennium. Framing questions of enduring significance to contemporary social and political theory in a new methodological light, this work will appeal to scholars and general readers interested in sociology, post modernism, cultural studies, political theory, and philosophy.

*Agricultural Bioeconomy* Chetan Keswani, Cristina Possas, Emmanuel Koukios, Davide Viaggi, 2022-11-29 *Agricultural Bioeconomy: Innovation and Foresight in the Post COVID Era* presents recent advancements in biotechnology exploring the optimal utilization of technologies to provide rapid and impactful economic recovery and sustainable resources in a future that will bear the mark of COVID 19. Understanding that there is a necessary balance between risk and reward, this book provides a foundational hypothesis as well as operational direction for addressing the commercialization and regulatory issues in a bio based economy where agricultural output is at the core. By presenting adaptable practices to successfully establish and progress agri based global bioeconomies, the book features a new paradigm focused on technological foresight and response to future risks and disasters. Key considerations include assessing and managing the urban bioeconomy, climate change mitigation, biofuels, and bioenergy, GMOs, and employment generation. This book provides the solid next step toward future proofing global economies using a combination of agricultural technologies and economic goals. Professionals and advanced students focused on the production of renewable biological resources and their conversion into value added products, including food, feed, bio based products, and bioenergy, will find this book useful. Addresses recent issues emerging in agro based economies. Empowers utilization of biotechnology to address worldwide ecological issues. Presents adaptable risk management approaches to the adoption of socially and financially valuable agri based technologies.

**More Books** Boston Public Library, 1928 *Think, Learn, Succeed* Dr. Caroline Leaf, 2018-08-07 Our thought lives have incredible power over our mental, emotional, and even physical well being. In fact, our thoughts can either limit us to what we believe we can do or release us to experience abilities well beyond our expectations. When we choose a mindset that extends our abilities rather than placing limits on ourselves, we will experience greater intellectual satisfaction, emotional control, and physical health. The only question is how. Backed by up to date scientific research and biblical insight, Dr. Caroline Leaf empowers readers to take control of their thoughts in order to take control of their lives. In this practical book, readers will learn to use The 5 step Switch on Your Brain Learning Program to build memory and learn effectively. The Gift Profile to discover the unique way they process information. The Mindfulness Guide to optimize their thought life and find their inner resilience. Dr. Leaf shows readers how to combine these powerful tools in order to improve memory, learning, cognitive and intellectual performance, work performance, physical performance, relationships, emotional health, and most

How to Speak Whale Tom Mustill, 2022-09-06 What if animals and humans could speak to one another Tom Mustill the nature documentarian who went viral when a thirty ton humpback whale breached onto his kayak asks this question in his thrilling investigation into whale science and animal communication A New Yorker Best Book of 2022 When a whale is in the water it is like an iceberg you only see a fraction of it and have no conception of its size On September 12 2015 Tom Mustill was paddling in a two person kayak with a friend just off the coast of California It was cold but idyllic until a humpback whale breached landing on top of them releasing the energy equivalent of forty hand grenades He was certain he was about to die but they both survived miraculously unscathed In the interviews that followed the incident Mustill was left with one question What could this astonishing encounter teach us Drawing from his experience as a naturalist and wildlife filmmaker Mustill started investigating human whale interactions around the world when he met two tech entrepreneurs who wanted to use artificial intelligence AI originally designed to translate human languages to discover patterns in the conversations of animals and decode them As he embarked on a journey into animal eavesdropping technologies where big data meets big beasts Mustill discovered that there is a revolution taking place in biology as the technologies developed to explore our own languages are turned to nature From seventeenth century Dutch inventors to the whaling industry of the nineteenth century to the cutting edge of Silicon Valley

How to Speak Whale examines how scientists and start ups around the world are decoding animal communications Whales with their giant mammalian brains virtuoso voices and long highly social lives offer one of the most realistic opportunities for this to happen But what would the consequences of such human animal interaction be We re about to find out
