Grammatical gender and linguistic complexity I Francesca Di Garbo , Bruno Olsson , Bernhard Wälchli ,2019 The many facets of grammatical gender remain one of the most fruitful areas of linguistic research and pose fascinating questions about the origins and development of complexity in language The present work is a two volume collection of 13 chapters on the topic of grammatical gender seen through the prism of linguistic complexity The contributions discuss what counts as complex and or simple in grammatical gender systems whether the distribution of gender systems across the world s languages relates to the language ecology and social history of speech communities Contributors demonstrate how the complexity of gender systems can be studied synchronically both in individual languages and over large cross linguistic samples and diachronically by exploring how gender systems change over time In addition to three chapters on the theoretical foundations of gender complexity volume one contains six chapters on grammatical gender and complexity in individual languages and language families of Africa New Guinea and South Asia This volume is complemented by volume two which consists of three chapters providing diachronic and typological case studies followed by a final chapter discussing old and new theoretical and empirical challenges in the study of the dynamics of gender complexity Multicultural Psychoeducational Assessment Elena L. Grigorenko,2009-04-13 A very useful resource not only for psychologists and education professionals but universally for all those experts interested in multicultural assessment Heikki Lyytinen PhD Professor of Developmental Neuropsychology University of Jyväskylä Finland This volume provides a thorough and provocative examination of how different cultures measure intelligence and skill why they use the tools they use and how their assessment methods are changing in the globalizing world The contributors discuss the extent to which methods of assessment are limited and culture bound These methods must be revised and adapted to become relevant to foreign cultures To this end this book uses theoretical models and empirical studies to explore the use and validity of standardized tests language and literacy tests job interviews and other methods of assessment across various cultures from both developed and developing countries Key topics include National and international standards and guidelines for test development and use Limitations of Western assessment tools for populations in the developing world The challenges of measuring abilities and competencies in Hispanics Latinos Developing and adapting language and literacy assessments in Arabic speaking countries Assessing competencies in reading and mathematics in Zambian children The Cambridge Handbook of Phonology Paul de Lacy,2007-02-01 Phonology the study of how the sounds of speech are represented in our minds is one of the core areas of linguistic theory and is central to the study of human language This handbook brings together the world s leading experts in phonology to present the most comprehensive and detailed overview of the field Focusing on research and the most

This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa the continent with the largest number of languages in the world It covers the major domains of linguistics offering both a representative picture of Africa's linguistic landscape as well as new and at times unconventional perspectives The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics **Causatives and Causation** Jae Jung Song, 2014-06-11
Causatives and Causation is the first comprehensive study of causative constructions found in the world's languages This important new research based on a data base of more than 600 languages not only investigates fully the richness and variety of causative types but also presents an alternative perspective to the traditional typological approach The new typology enables a better understanding of how the human mind cognizes causation and how this is reflected in language Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology Drawing on the theoretical insight of Role and Reference Grammar this book provides a case study of the causative constructions in Korean providing additional support for both the proposed new typology and the diachronic model It also examines the pragmatic foundations of causatives an important but previously unexplored area of study A Phonological Study of Gonja with Special Reference to the Operation of Tone in the Grammatical Hierarchy Colin Painter, 1969 **Resolving Hiatus** Roderic F. Casali, 2021-07-28 First published in 1998 Part of the Outstanding Dissertations in Linguistics series this work looks at the analysis of elision directionality and the correlation between the active value of ATR in a language and the language's vowel inventory The paper develops the idea of ATR Predictability *UCLA Working Papers in Phonology*, 1996 **Generative Phonology Workbook** M. Stanley Whitley, Melvin Stanley Whitley, 1978 *Contexts of Kinship* Esther N. Goody, 2005-07-07 In her study of domestic organization in Gonja Esther Goody has concentrated on tracing the interrelationships between political and domestic institutions in a bilateral kinship system **Working Papers of the Cornell Phonetics Laboratory**, 1996 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1973 *Language in Africa* Edgar Gregersen, Edgar A. Gregersen, 1977 This book developed out of a survey course on African languages that Uriel Weinreich invited the author to teach at Columbia University The focus of the course changed considerably in the years that the author taught the course 1964-1968 in large part to accommodate the interests of many students without a background in linguistics but registered for the course The one thing African languages have in common setting them off from all the other languages in the world is the fact that they are spoken in Africa
