**Fish Pheromones and Related Cues** P. W. Sorensen,Brian D. Wisenden,2015-03-16 Pheromones are chemical cues that pass between members of the same species that convey specific adaptive information These cues and related chemicals whose function are less well defined are especially important to fishes because of their aquatic environments and complex behaviors Pheromones are also of increasing interest in both basic and applied aspects of fish biology because they can be used to manipulate fish behavior and may explain phenomena such as fishery collapse *Fish Pheromones and Related Cues* provides a timely synthesis of this growing body of research in freshwater and marine species and explores everything from how these chemical signals evolved are produced released and then processed and finally to potential applications in fish culture and conservation *Fish Pheromones and Related Cues* opens with a useful overview on the theory of chemical communication and definitions Chapters then progress by examining the biological importance of pheromones in inter and

intra species communication the role these chemical cues play in a variety biological functions from reproduction to predation and then how they evolved and are detected and recognized by fish nervous systems Final chapters provide valuable insight into how pheromones can be measured how pheromonal disruption can explain effects of environmental pollution and lastly how they pheromones are being applied in real world efforts to culture fish species and to conserve our wild populations and control invasive species With far reaching economic evolutionary and ecological implications Fish Pheromones and Related Cues will be an essential volume for anyone working in the fields of chemical communication fish biology fisheries science aquatic conservation ecology invasive species control and aquaculture iPSCs from Diverse Species Alexander Birbrair,2020-09-29 The series Advances in Stem Cell Biology is a timely and expansive collection of comprehensive information and new discoveries in the field of stem cell biology iPSCs from Diverse Species Volume 2 addresses how induced pluripotent stem cells iPSCs can be derived from different species The volume teaches the reader about modern state of the art methodologies to derive iPSCs from distinct species This volume will cover how to derive iPSCs from species like nonhuman primates horses dogs pigs rats rabbits and others It also discusses the importance of iPSCs in species conservation Detailed description on methods used to obtain iPSCs from humans and other species expands the knowledge and understanding of stem cell biology and provides a potent tool to model diseases The volume is written for researchers and scientists in stem cell biology and regenerative medicine and is contributed by world renowned authors in the field Provides overview of the fast moving field of iPSC technology Covers iPCs from the following species humans monkeys horses dogs pigs rats rabbits and more Consists of contributions from stem cell leaders around the world

nature of capitalism through historical overviews of twentieth century businesses and a wide range of focused case studies Beginning early in the century contributors explore the response of business leaders to environmental challenges in an era long before the formation of the modern regulatory state Moving on to midcentury environmental initiatives scholars analyze failed business efforts to green products and packaging such as the infamous six pack ring in the 1960s and 1970s The last section contains case studies of businesses that successfully managed greening initiatives from the first effort by an electric utility to promote conservation to the environmental overhaul of a Swedish mining company to the problem of household waste in pre 1990 West Germany Ranging in geographic scope from Europe to the United States Green Capitalism raises questions about capitalism in different historical sociocultural and political contexts Contributors Hartmut Berghoff Ann Kristin Bergquist Brian C Black William D Bryan Julie Cohn Leif Fredrickson Hugh S Gorman Geoffrey Jones David Kinkela Roman Kster Joseph A Pratt Adam Rome Christine Meisner Rosen
