Graphing Data: When graphing data, the first step is to decide on the scale of the axes. The x-axis represents the independent variable, and the y-axis represents the dependent variable. The scale of the axes should be chosen so that the data can be plotted accurately and the graph is easy to read. The scale of the x-axis should be chosen so that the data can be plotted accurately and the graph is easy to read. The scale of the y-axis should be chosen so that the data can be plotted accurately and the graph is easy to read.
