Louise Wallenberg, Andrea Kollnitz

Indra Kagis McEwen Book:

All the King's Horses Indra Kagis McEwen, 2023-04-11 How the Italian Renaissance reinvented the power of princes by rediscovering Vitruvius and his architecture and justified their right to rule In Vitruvius Writing the Body of Architecture Indra Kagis McEwen argued that Vitruvius's first century BC treatise *De architectura* was informed by imperial ideology giving architecture a role in the imperial Roman project of world rule In her sequel *All the King's Horses* McEwen focuses on the early Renaissance reception of Vitruvius's thought beginning with Petrarch a political reception preoccupied with legitimating existing power structures During this age of princes various signori took over Italian towns and cities displacing independent communes and their avowed ideal of the common good In turn architects taking up Vitruvius's mantle designed for these princes with the intent of making their power manifest and celebrating the rule of one Through meticulous descriptions of the work of architects and artists from Leon Battista Alberti to Leonardo da Vinci McEwen explains how architecture became an instrument of control in the early Italian Renaissance She shows how architectural magnificence supported claims to power a phenomenon best displayed in one of the era's most prominent monumental themes the equestrian statue of a prince in which the horse became an emanation of the will of the rider its strength the expression of his strength

Vitruvius Indra Kagis McEwen, 2004-09-17 A historical study of Vitruvius's *De architectura* showing that his purpose in writing the whole body of architecture was shaped by the imperial Roman project of world domination Vitruvius's *De architectura* is the only major work on architecture to survive from classical antiquity and until the eighteenth century it was the text to which all other architectural treatises referred While European classicists have focused on the factual truth of the text itself English speaking architects and architectural theorists have viewed it as a timeless source of valuable metaphors Departing from both perspectives Indra Kagis McEwen examines the work's meaning and significance in its own time Vitruvius dedicated *De architectura* to his patron Augustus Caesar the first Roman emperor whose rise to power inspired its composition near the end of the first century B C McEwen argues that the imperial project of world dominion shaped Vitruvius's purpose in writing what he calls the whole body of architecture Specifically Vitruvius's aim was to present his discipline as the means for making the emperor's body congruent with the imagined body of the world he would rule Each of the book's four chapters treats a different Vitruvian body Chapter 1 The Angelic Body deals with the book as a book in terms of contemporary events and thought particularly Stoicism and Stoic theories of language Chapter 2 The Herculean Body addresses the book's and its author's relation to Augustus whose double Vitruvius means the architect to be Chapter 3 The Body Beautiful discusses the relation of proportion and geometry to architectural beauty and the role of beauty in forging the new world order Finally Chapter 4 The Body of the King explores the nature and unprecedented extent of Augustan building programs Included is an examination of the famous statue of Augustus from Prima Porta sculpted soon after the appearance of *De architectura*

The Digital, a Continent? Vera Bühlmann, 2023-12-18 In *The Digital a Continent* the author argues in

favor of a way of thinking about digital technology that draws on the new materialism She uses photosynthesis and nuclear fission as examples of processes that are as artificial as they are natural to explain how digital technology can be viewed within the paradigm of a communicative physics in which poetics interacts with mathematical thinking The author concludes that we can better understand ourselves and digital technology by developing notions of the multifaceted ways energy form and intellect interact in global architectonics Theoretical consideration of digital technology Visual language and science New volume in the Applied Virtuality Book Series *Vitruvianism* Paolo Sanvito, 2015-12-14 Vitruvius De architectura the only extant work from Antiquity dedicated to Architecture has had a rich and diverse reception history The present volume aims to highlight the different aspects of this history showing how Vitruvius work was systematically and continuously misunderstood to justify innovation Its comprehensive and in depth analyses make this book a reference work in the field of Vitruvian scholarship "Architects, Angels, Activists and the City of Bath, 1765-1965" Cynthia Imogen Hammond, 2017-07-05 A unique contribution to the architectural and social history of Bath Architects Angels Activists and the City of Bath 1765-1965 Engaging with Women's Spatial Interventions in Buildings and Landscape approaches the past with the methods of the architectural historian and the site specific interventions of the contemporary artist Looking beyond and behind Bath's strategic marshalling of its past Cynthia Imogen Hammond presents the ways in which women across classes shaped the built environment and designed landscapes of one of England's most architecturally significant cities This study argues that Bath's efforts to preserve itself as an idealized Georgian town reveal an aesthetics of exclusion Jane Austen may be well known but the role of historic women in the creation of this city has had minimal treatment within the city's collective public memory This book is an intervention into this memory the author uses site specific works of public art as strategic counterparts to her historical readings Through them she aims to transform as well as critique the urban image of Bath At once a performative literature an extensively researched history and an alternative guide to the city Architects Angels Activists engages with current struggles over urban signification in Bath and beyond *Rewriting Alberti* Peter Eisenman, 2025-09-09 A fresh groundbreaking analysis of renowned Renaissance architect Leon Battista Alberti's five built works suggesting a new relationship of form to meaning Much has been written about Renaissance architect Leon Battista Alberti's mantra of part to whole as one of the continuing conditions of architecture While this underlying thesis has often been repeated in the annals of architectural history and theory architects have rarely questioned the idea In *Rewriting Alberti* architect Peter Eisenman suggests however that Alberti provoked a radical discourse beyond the part to whole dialogue featured in his *Ten Books of Architecture* Eisenman's in depth analysis of Alberti's five built works reveals a disjunction between the architect's buildings and theoretical writings suggesting a new relationship of form to meaning based on the fragmentation of homogeneous space *Rewriting Alberti* includes contributions by Pier Vittorio Aureli Mario Carpo and Daniel Sherer Carpo an architectural historian and critic theorizes that Alberti's work initiated an idea of the

discipline as a notational system akin to contemporary computational logics By way of comparison Sherer an architectural historian reconsiders critic Manfredo Tafuri s readings of Alberti and architect and theorist Aureli draws on Alberti to propose another idea of the architectural project Here in one book are four different discourses and more than 60 drawings that look back at the origins of architectural signs and semiology and forward to understand the way that history informs architecture today

Architecture, Futurability and the Untimely Ingrid Mayrhofer-Hufnagl,2022-01-05 The planetary instantaneity that digital technologies have enabled is leading to an effacement of the divisions that separate the past from the future ensuring that the present is ubiquitous While contemporary architecture seems to have lost the capacity to conceive of the past as a transformative force this book stresses the need to rethink today s complex temporal mechanisms through the notion of the untimely This concept opens up a whole spectrum of possibilities to go beyond what seems predictable The contributors to this book employ critical concepts and architectural design tools in order to offer experimental and speculative approaches for unknown futures of architecture

The True, the Fictive, and the Real Quatremere De Quincy,1999 The importance of this dictionary stems from Quatremere re s profound reflections on the nature of architecture on the principles which are at the source of his rules and on the roles of imitation and invention within tradition This book provides the first English translation of the theoretical essays from his seminal work *Le Dictionnaire Historique d Architecture*

Gender Studies in Architecture Dörte Kuhlmann,2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment

Ordonnance for the Five Kinds of Columns after the Method of the Ancients Claude Perrault,1996-08-22 Perrault argues that rules of architecture be determined by reason not by ancient precedent

[On the Ruins of Babel](#) Daniel Leonhard Purdy,2011-03-15 The eighteenth century struggled to define architecture as either an art or a science the image of the architect as a grand figure who synthesizes all other disciplines within a single master plan emerged from this discourse Immanuel Kant and Johann Wolfgang Goethe described the architect as their equal a genius with godlike creativity For writers from Descartes to

Freud architectural reasoning provided a method for critically examining consciousness The architect as philosophers liked to think of him was obligated by the design and construction process to mediate between the abstract and the actual In *On the Ruins of Babel* Daniel Purdy traces this notion back to its wellspring He surveys the volatile state of architectural theory in the Enlightenment brought on by the newly emerged scientific critiques of Renaissance cosmology then shows how German writers redeployed Renaissance terminology so that harmony unity synthesis foundation and orderliness became states of consciousness rather than terms used to describe the built world Purdy's distinctly new interpretation of German theory reveals how metaphors constitute interior life as an architectural space to be designed constructed renovated or demolished He elucidates the close affinity between Hegel's Romantic aesthetic of space and Daniel Libeskind's deconstruction of monumental architecture in Berlin's Jewish Museum Through a careful reading of Walter Benjamin's writing on architecture as myth Purdy details how classical architecture shaped Benjamin's modernist interpretations of urban life particularly his elaboration on Freud's archaeology of the unconscious Benjamin's essays on dreams and architecture turn the individualist sensibility of the Enlightenment into a collective and mythic identification between humans and buildings

On Food David Schildberger, 2023-06-19 Free thinking unconstrained by facts The book is based on the thesis that we live in a world of abundance full of natural riches and cultural artifacts full of human intellect and powerful technologies Our thinking however is dominated by the opposite the notion of scarcity The limits of nature act as an inevitable necessity In his book David Schildberger adopts a novel approach to the subject of resources with the help of intelligent instruments that introduce new foods such as chocolate made from cocoa cell cultures and even a fruit bearing vine raised far from a vineyard With his imagined scenarios the author invites the reader to dare stretch their intellectual imaginations and ultimately presents nature as a contingent Conceptual models on the subject of nature and alternative ways of producing food Recommended reading for architectural IT specialists New volume in the Applied Virtuality Book Series

Da Vinci's Ghost Toby Lester, 2012-02-07 An award winning author takes on the genesis of Leonardo da Vinci's Vitruvian Man In this modest drawing da Vinci attempted nothing less than to calibrate the harmonies of the universe and understand the central role man played in the cosmos Lester brings Vitruvian Man to life resurrecting the ghost of an unknown da Vinci

Fashion Aesthetics and Ethics Louise Wallenberg, Andrea Kollnitz, 2023-05-04 How are aesthetics and ethics related to the practical realities of the global fashion industry Both have played an important role in academic fashion studies to this point but they are most often discussed in the context of abstract phenomena such as modernity and capitalism or identity issues such as sexuality class and gender The essays in this volume strive instead to show how the realities of the global fashion industry have important and pertinent aesthetic and ethical consequences This collection provides critical and philosophical analysis of the interplay of aesthetics and ethics within the global fashion industry Characterized by an increasingly fast spinning production the industry is highly exploitative in terms of environment and

labor force underpaid textile workers retailers working under brutal competition from the mass merchandise discounters young designers seamstresses and curators often working for free and a vast body of aspiring models In addition fashion related aesthetic ideals are becoming more influential than ever in directing consumers in their social and personal identification processes and bodily practices with sometimes fatal consequences Covering a wide range of subjects such as fashion s highly problematic production and consumption practices the possibility of producing and consuming fashion ethically fashion s intimate connection with nature and technology Fashion Aesthetics and Ethics highlights the powerful aesthetical presence of fashion in relation to its ethical premises and often problematic outcomes Code and Clay, Data and Dirt Shannon Mattern,2017-11-01 For years pundits have trumpeted the earthshattering changes that big data and smart networks will soon bring to our cities But what if cities have long been built for intelligence maybe for millennia In Code and Clay Data and Dirt Shannon Mattern advances the provocative argument that our urban spaces have been smart and mediated for thousands of years Offering powerful new ways of thinking about our cities Code and Clay Data and Dirt goes far beyond the standard historical concepts of origins development revolutions and the accomplishments of an elite few Mattern shows that in their architecture laws street layouts and civic knowledge and through technologies including the telephone telegraph radio printing writing and even the human voice cities have long negotiated a rich exchange between analog and digital code and clay data and dirt ether and ore Mattern s vivid prose takes readers through a historically and geographically broad range of stories scenes and locations synthesizing a new narrative for our urban spaces Taking media archaeology to the city s streets Code and Clay Data and Dirt reveals new ways to write our urban media and cultural histories **Architecture, Liberty and Civic Order** Carroll William Westfall,2016-03-09 This book brings to light central topics that are neglected in current histories and theories of architecture and urbanism These include the role of imitation in earlier centuries and its potential role in present practice the necessary relationship between architecture urbanism and the rural districts and their counterpart in the civil order that builds and uses what is built The narrative traces two models for the practice of architecture One follows the ancient model in which the architect renders his service to serve the interests of others it survives and is dominant in modernism The other first formulated in the fifteenth century by Leon Battista Alberti has the architect use his talent in coordination with others to contribute to the common good of a republican civil order that seeks to protect its own liberty and that of its citizens Palladio practiced this way and so did Thomas Jefferson when he founded a uniquely American architecture the counterpart to the nation s founding This narrative gives particular emphasis to the contrasting developments in architecture on the opposite sides of the English Channel The book presents the value for clients and architects today and in the future of drawing on history and tradition It stresses the importance indeed the urgency of restoring traditional practices so that we can build just beautiful and sustainable cities and rural districts that will once again assist citizens in living not only abundantly but also well as they pursue their happiness *Socrates' Ancestor*

Indra Kagis McEwen,1993 a rich and poetic exploration of architectural beginnings and the dawn of Western philosophy in preclassical Greece *The Renaissance of Empire in Early Modern Europe* Thomas James Dandeleet,2014-04-14 Examines

the intellectual and artistic foundations of the Imperial Renaissance in fourteenth and fifteenth century Italy and traces its political realization in sixteenth and seventeenth century Europe **Vitruvian Man** John Oksanish,2019-10-07

Professionalism is political This book offers a new assessment of the Roman architect Vitruvius and his treatise *On Architecture* dedicated to Augustus in the 20s BCE Once reviled by scholars Vitruvius emerges as an imperial expert par excellence when read alongside literary coevals through an intertextual lens No building of Vitruvius name survives from antiquity but his treatise remains a formidable literary construction that partakes of Rome's vibrant textual culture The book explores Vitruvius portrait of the ideal architect as an imposing Vitruvian man at the dawn of Augustus empire In direct dialogue with his republican model Cicero's ideal orator the architect embodies a distinctly imperial civic ethos in which technically skilled partisans supersede old elites as guarantors of Augustan authority Vitruvius promises to shape not only the emperor's legacy with architecture but also the notion of a Roman citizen through his ideal architect **The Politics of the Piazza** Eamonn Canniffe,2016-03-03 Through a detailed study of the principal spaces of Italian cities this book explores the relationship between political systems and their methods of representation in architecture Illustrated by contemporary photographs and analytical drawings it examines significant piazzas and situates these examples in their social and political contexts highlighting the urban evidence of shifts between autocratic and democratic forms of government through history The ideological role of political architecture is analyzed through the work of various theorists including ancient sources Renaissance thinkers and modern critics The complex evolution of individual spaces over time is represented by their physical layering from ancient times to the present day Other examples connect the development of different characteristic types of Italian urban form in chronological sequence categorized by art historical and political periods
