## **Infant Toddler Environment Rating Scale Revised Edition:**

*Infant/toddler Environment Rating Scale* Thelma Harms, Debby Cryer, Richard M. Clifford, 1990 The 35 items in the ITERS are divided into seven categories: Furnishings and Display for Children, Personal Care Routines, Listening and Talking, Learning Activities, Interactions, Program Structure, and Adult Needs. **Infant/Toddler Environment Rating Scale (ITERS-3)**

Thelma Harms, Debby Cryer, Richard M. Clifford, Noreen Yazejian, 2017-07-07 Building on extensive feedback from the field as well as vigorous new research on how best to support infant and toddler development and learning, the authors have revised and updated the widely used Infant Toddler Environment Rating Scale. ITERS 3 is the next generation assessment tool for use in center-based child care programs for infants and toddlers up to 36 months of age. ITERS 3 focuses on the full range of needs of infants and toddlers and provides a framework for improving program quality. Further, the scale assesses both environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers, including language, cognitive, social, emotional, and physical development, as well as concern for health and safety. ITERS 3 is appropriate for state and district-wide QRIS and continuous quality improvement program evaluation by directors and supervisors, teacher self-evaluation, monitoring by agency staff, and teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. While the approach to assessing quality and the scoring process remain the same for the new ITERS 3, users will find the following improvements informed by extensive use of the ITERS in the field and by the most recent research: Enhanced focus on interactions and the role of the teacher; Six new language and literacy items; A new item on beginning math experiences; Expanded age range to include children from birth to 36 months; A new approach to scoring based solely on observation of ongoing classroom activity; 3-hour time sample; The elimination of the parents staff subscale and teacher interviews, freeing up time for observing more actual classroom practice; Improved indicator scaling providing more precise and useful scores for use in professional development and self-improvement; Reduced emphasis on the number of materials along with greater emphasis on how materials are used to encourage learning; Suitable for use in inclusive and culturally diverse programs. ITERS 3 subscales evaluate Space and Furnishings, Personal Care Routines, Language and Books, Activities, Interaction, Program Structure. *Infant toddler environment rating scale*, 2008 **Infant Toddler Environment Rating Scale Scoring Sheets** Thelma Harms, 1990-03-01

Horm, 2019-10-23 This volume extends the knowledge base supporting research informed child care for infants and toddlers while simultaneously highlighting areas of study ripe for future research The authors demonstrate from a systems perspective that the experiences and outcomes of very young children in child care are influenced by characteristics of and interactions between the children adults and settings Varying methodological approaches as well as the utilization of newer data collection instruments inform the field's understanding of current practices and procedures while offering guidance for future programming and policy In turn the chapters highlight a plethora of open questions and a need for a new generation of research to support the field of infant toddler care Future challenges are evident in the recognition of the inadequate nature of our current measures of child outcomes and classroom processes the field's unmet promise to incorporate interdisciplinary perspectives and the need for newer methodological designs that blend the strengths of quantitative and qualitative approaches These issues are important given the growing demand for infant toddler care and the increasing recognition of the unique role of this age period in serving as the foundation for all later development This book was originally published as a special issue of *Early Education and Development*
