the fact that several mechanisms which are traditionally regarded as morphological are systematically mirrored in other components of the language system such as e.g. syntax or phonology. Against this background, the current volume fills a critical gap in the research on this topic as it brings together various perspectives on interfacing areas of morphology. The approaches focus on the interplay between different types of grammatical and non-linguistic information in general as well as on the formation and modification of words and lexical units. Morpho-syntactic, semantic, phonological as well as textual aspects are examined from a broad disciplinary spectrum in order to contribute to an investigation of lexical creativity and flexibility from perspectives of system-theoretical and cognitive scientific linguistics as well as computer linguistics and literary science.

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer, Thrasyvoulos Tsiatsos, 2020-09-10. This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training case studies on mobile learning and 5G network infrastructure. Today, interactive mobile technologies have become the core of many, if not all, fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019) which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies with a focus on learning. The IMCL conferences have since become a central forum for the exchange of new research results and relevant trends as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.
