You do not have to remove the top cover to adjust the rangefinder. The horizontal or infinity adjustment is beneath an access screw in the film compartment, Fig. 1. Vertical alignment is made through an access hole underneath the hot-shoe decorator plate, Fig. 2.

The front standard and complete lens assembly are removed as one

subassembly. Remove the self-timer lever and peel off the leatherette. There is another easy adjustment point. Under the small plate now visible on the wind side of the camera is an eccentric used to adjust exposure by changing the position at which the exposure meter is trapped by the mechanical exposure system, Fig. 3. This is the first adjustment to be made on an improperly exposing camera after the mechanical system is checked and found to be operating properly.

Continuing with the disassembly remove the nameplate retaining ring, Fig. 4, and lift out the ring. Unsolder the CdS cell leads, Fig. 5. Here is another adjustment point. With the nameplate ring removed, lens collimation can now be ad-
