Knowledge Games Karen Schrier, 2016-06-15 Are games the knowledge producers of the future Imagine if new knowledge and insights came not just from research centers think tanks and universities but also from games of all things Video games have been viewed as causing social problems but what if they actually helped solve them This question drives Karen Schrier's *Knowledge Games* which seeks to uncover the potentials and pitfalls of using games to make discoveries solve real world problems and better understand our world For example so called knowledge games such as Foldit a protein folding puzzle game SchoolLife which crowdsources bullying interventions and Reverse the Odds in which mobile game players analyze breast cancer data are already being used by researchers to gain scientific psychological and humanistic insights Schrier argues that knowledge games are potentially powerful because of their ability to motivate a crowd of problem solvers within a dynamic system while also tapping into the innovative data processing and computational abilities of games In the near future Schrier asserts knowledge games may be created to understand and predict voting behavior climate concerns historical perspectives online harassment susceptibility to depression or optimal advertising strategies among other things In addition to investigating the intersection of games problem solving and crowdsourcing Schrier examines what happens when knowledge emerges from games and game players rather than scientists professionals and researchers This accessible book also critiques the limits and implications of games and considers how they may redefine what it means to produce knowledge to play to educate and to be a citizen

Promoting Mental Health and Wellbeing Among Young People Maj Britt Dahl Nielsen, Susan Andersen, Sigurd Lauridsen, 2025-09-10 Mental disorders account for a

large proportion of the disease burden in young people and poor mental health is strongly related to lower educational achievements and labor market attainment and other health problems including substance abuse violence and poor reproductive and sexual health Evidence suggests that the COVID 19 pandemic might have had a negative effect on young people s mental health and knowledge about secular trends in well being and mental health problems is important for planning public health interventions Research on health promotion and preventive interventions remains scarce and the mental health needs of young people are often unmet and research is urgently needed to develop affordable and feasible interventions In Denmark and other countries the mental health of young people has been declining especially in the wake of COVID 19 The main goal of this research topic is to further our understanding of trends in mental health and well being among young people and aid the development of feasible and effective public health interventions This Research Topic welcomes empirical studies including qualitative quantitative and mixed method research design papers and systematic reviews focusing on but not limited to the following sub topics Trends in mental health and well being among young people The impact of COVID 19 on mental health and wellbeing New and emerging risks for mental health and well being for example related to online and mobile technology Barriers to treatment Development of affordable and feasible community based interventions Implementation and effectiveness of preventive and health promotion interventions including universal interventions and interventions targeting vulnerable groups
