Otieno, 2016 This volume provides a political economy analysis of leadership and economic management in crises in developing economies based on Zimbabwe's experience **Financial Inclusion and Digital Transformation Regulatory Practices in Selected SADC Countries** Howard Chitimira, Tapiwa Victor Warikandwa, 2023-03-28 This book investigates the regulation and promotion of financial inclusion and provides a comparative analysis of the regulation promotion and enforcement of the relevant laws in the SADC in particular South Africa Namibia Botswana and Zimbabwe as well as the challenges of financial inclusion In turn it evaluates financial inclusion in the context of specific challenges faced by unbanked and underbanked customers who are easy targets for cyber criminals because they tend to have lower levels of digital literacy The book presents novel discussions that identify the challenges and flaws associated with the enforcement of financial inclusion laws and related measures intended to promote financial inclusion in the SADC region This is primarily done in order to reveal the current strengths and weaknesses of financial inclusion laws in relation to certain aspects of the companies securities and financial markets in the region For example there is no common financial inclusion instrument law that is effectively and uniformly applied throughout the SADC This has impeded the enforcement authorities efforts to effectively combat financial exclusion across the region The book is likely the most comprehensive study to date on the regulation and promotion of financial inclusion in the SADC region and fills a major gap in SADC and African legal jurisprudence As such it offers a valuable asset for policymakers attorneys bankers securities share holders and other market participants who deal with financial inclusion as well as undergraduate and graduate students interested in the topic Mugabeism after Mugabe? Duri, Fidelis Peter Thomas, Marongwe, Ngonidzashe, Mawere, Munyaradzi, 2019-10-22 Arguably one of the long waited political handover of power globally happened in November 2017 in Zimbabwe when the former and now late 37 year long serving and divisive President Robert Gabriel Mugabe was forced out

of power by a combination of forces that were spearheaded by the military's Operation Restore Legacy. Mugabe's departure ushered in President Emmerson Mnangagwa's reign. This transition has variously been characterised as marking the inauguration of the Second Republic or New Dispensation or as heralding a new Zimbabwe that is Open for Business. From the moment of the investiture of President Mnangagwa's government, anticipations of seismic changes to the order of doing business by both the incoming government and the larger Zimbabwean society in general were extremely high. There was an expectation that international cooperation with global partners especially in the West would be restored alongside the reinvigoration of a near comatose domestic economy. But did this ever happen? This volume interrogates the impact of the introduction of the Mnangagwa administration from November 2017. The book seeks to broadly dissect and troubleshoot issues of continuity and change from Mugabe's reign into Mnangagwa's Second Republic. In doing so, the book attempts to respond to the grand question: To what extent has Mugabeism, that was the hallmark of Mugabe's reign, continued or discontinued into the Second Republic? The volume, which comes as a sequel to *The end of an era: Robert Mugabe and a conflicting legacy*, is sure to generate interest and responses from students and academics in the fields of History, International Studies, Political Science, Sociology, and Social anthropology, as well as from practitioners in the human rights, transitional justice, conflict resolution, security studies, and diplomatic fields.

Hyperinflation He Liping, 2017-10-03. Since the 1970s when the world was experiencing an age of inflation, a great volume of academic research about hyperinflation has been conducted. However, it is also true that parrot-like superficial talks abound without questioning the economic, political, and social foundations existing underneath the economic phenomenon. Based on research results of contemporary economists, media reports, and historical works, this book will be the most comprehensive narrative of all major events of hyperinflation worldwide from the turn of the first millennium to the mid 2010s. Firstly, it gives a brief illustration of the basic concepts of hyperinflation, starting with the definitions and price measurement. Then it traces and analyzes all major episodes of hyperinflation that occurred over the past two thousand years or so, from the earliest incidence to the four tidal waves in the 20th century and to the three latest episodes in the 21st century. Using basic concepts in modern finance such as indexation and dollarization, this book explains why hyperinflation in some countries could explode into astronomical levels while rhythms of hyperinflation in the 20th century world are in resonance of megatrends in world economy and politics. Finally, this book underscores the importance of policy making, institutional building, and international relations in the process of hyperinflation and stabilization. Scholars and students studying money and finance, economic history, international finance, and economics will be attracted by this book.

Climate Change and Agriculture in Zimbabwe Mark Matsa, 2020-09-03. This book proves through empirical research that indigenous and traditional agricultural communities have experienced severe climate change impacts and have developed corresponding livelihood strategies to strengthen their resilience in a variable climate. With a focus on indigenous minority farming communities in the developing region of South Western Zimbabwe, the

study presents both qualitative and quantitative approaches of data analysis to assess sustainability problems amid climate change and climate variability challenges and proposes potential solutions In eight chapters the book expands on the scarce availability of community based research on climate change and variability in Zimbabwe The book is meant for college and university students and stakeholders involved in development work in rural minority farmer communities especially in climate change prone regions of Africa and other developing countries who have very few options of adaptation and mitigation
