*The SAGE Handbook of Research Management* Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 *The Handbook of Research Management* is a unique tool for the newly promoted research leader Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres institutes and programmes Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders Although many scientific and technological disciplines have long been organized in this way few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice

This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts. This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration. The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them.

*The Routledge Handbook of Place* Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26. The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars providing a comprehensive yet cutting edge overview of theories, concepts and creative engagements with place that resonate with contemporary concerns and debates. The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world. It includes an introductory chapter which outlines key definitions, draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book explaining the logic of the seven clearly themed sections. Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow. The original and distinctive contributions from both new and leading authorities from across the discipline provide a wide, rich and comprehensive collection that chimes with current critical thinking in geography. The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in depth critical overviews of theoretical approaches to place and new explorations and cases that chart a framework for future research. It charts the multiple ways in which place might be conceived, situated and practised. This unique comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers. It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography, Sociology and Politics and interdisciplinary fields such as Urban Studies, Environmental Studies and Planning.
