

DESCRIPTION

The Electro-Voice model E-V SEVEN system is a carefully designed two-way reproducer offering outstanding performance in an enclosure of surprisingly modest dimensions. Lower distortion and wide frequency range are achieved by the use of two separate drivers, each handling a special portion of the audible spectrum. The component-quality 8-inch woofer features such refinements as Alnico V magnet, precision-wound voice coil, and a linear suspension which allows long, yet carefully controlled, excursions.

Frequencies above 2000 cps are handled by a three-and one-half inch specially-constructed, cone-type tweeter which provides exceptionally smooth treble response without undesirable harshness. Excellent high-frequency dispersion insures lifelike realism, especially when the E-V SEVEN is used in stereo applications. A two-way electrical crossover provides smooth transition from one driver unit to the other. Finest quality components including encapsulated inductors are employed for maximum power handling capacity and crossover frequency accuracy.

The attractive E-V SEVEN enclosure is rigidly constructed throughout and is handsomely finished in walnut on all four sides. The nameplate may be rotated to permit either horizontal or vertical placement.

FEATURES

- Two separate component quality drivers for wide range, low distortion
- Fine furniture cabinetry finished on four sides
- Acoustic-suspension design for extended bass response
