

DMS-1181 Series

DeltaMax™ Low-Frequency Full-Range Electronically Controlled Sound Reinforcement System

- EVX-180A woofer
- Superior linear excursion capability
- Frontal dimensions equal to DMS-1152/64
- 36-100 Hz operating range
- Full flying capability

Description

The Electro-Voice DMS-1181 subwoofer loudspeaker system is part of the DeltaMax™ series and is intended for high-level sound reinforcement for fixed-installation and touring-sound applications. The DMS-1181 is a single 18-inch loudspeaker system designed to be used with the dedicated DMC-2181X analog electronic controller as well as the Dc34 digital crossover system. These units all provide frequency division, time delay and equalization, and are appropriate for use with these subwoofers in connection with other full-range DeltaMax™ series products.

The DMS-1181 is a vented-box design that utilizes a single EVX-180A subwoofer. This subwoofer features a 102-mm (4-inch) voice coil and an extremely high X_{max} (maximum linear excursion) for very-high sound-pressure levels at very-low frequencies.

The DMS-1181 enclosure is constructed of 18-mm, 13-ply, birch plywood and is available in a black textured-paint finish (DMS-1181P). The system is a compact rectangular shape and includes a unique protective vinyl-clad steel grille.

The optional flying version includes four full-track flying points (two on the top and two on the bottom) (DMS-1181PF).

Applications

The DMS-1181 loudspeaker system is an ideal choice for any professional installation or touring application where accurate low-frequency sound reproduction at high sound pressure levels is required. In combination with the DeltaMax™ electronic control units (listed in this data sheet), the system will produce maximum fidelity, extended bandwidth, and reliability. The DMS-1181 and its controllers offer subwoofer applications where high acoustic power is required from 36 Hz to 100 Hz. The DMS-1181 is designed specifically to be used in conjunction with the full-range DeltaMax™ systems (such as DMS-1122/85, DMS-1152/64 and DMS-1183/64).

Power-Handling Test

Electro-Voice components and systems are manufactured to exacting standards to ensure reliability in continuous use in arduous real-life conditions. Besides utilizing industry-standard power tests, extreme in-house power tests which push the performance boundaries of the loudspeakers are also performed for an extra measure of reliability. The DMS-1181 systems are rated per ANSI/EIA RS-426-A 1980 Loud-

speaker Power Rating. Full Range Test, which uses a shaped random-noise signal to simulate typical music to test the mechanical and thermal capabilities of the loudspeakers. Specifically, the DMS-1181 passes the ANSI/EIA RS-426-A power test with the following test parameters:

P_{EMAX} :	600 watts
Test Voltages:	58.7 volts rms
	117.4 volts peak
$R_{in}(1.15 R_o)$:	5.75 ohms

Crossover, Equalization and Time Delay Controller

The DMS-1181 speaker system and its variants are designed as part of an integrated package that utilizes any of the following controllers: the DMC-2181X, or the Electro-Voice Dc34 digital electronic crossover system. Optimal performance of the DMS-1181 speaker system can only be assured when using the above-referenced controllers. All controllers used with the DMS-1181 feature an 80-Hz crossover frequency utilizing 24-dB-per-octave Linkwitz-Riley filters. The protection circuitry in the DMC-2181X controller ensures maximum reliability and functionality.
