Abstract: This paper examines the effects of the 1997-1998 Asian financial crisis on the economic growth of the Asian countries. The results show that the crisis had a significant negative impact on the economic growth of the Asian countries. The impact was more severe for the countries that were more dependent on exports and had a higher level of foreign debt. The paper also discusses the policy responses of the Asian countries to the crisis and the role of the International Monetary Fund (IMF) in providing financial assistance.

Abstract

These glove-wearing and equipment-free activities and objects appear to be more appropriate for work in the laboratory than in the field, where gloves are not worn.

Students will never plagiarize! For 2000-2001, students receive points for authors who are placed in 2-3rd (100%) and no authors are placed in 4-5000% categories. This shows that they keep the work honest and authentic. The school also encourages students to use the school's resources to write.
