Electronic Datasheets User Guide:

Applied Analog Electronics: A First Course In Electronics Kevin Karplus, 2023-06-06 This textbook is for a first course on electronics. It assumes no prior electronics experience but does assume that students have had calculus 1, single variable differential calculus, and high school physics. A key idea of the course is that students need a lot of design experience and hands-on work rather than a lot of theory. The course is centered around the labs, which are a mix of design labs and measurement modeling labs. This unique volume takes students from knowing no electronics to being able to design and build amplifier and filter circuits for connecting sensors to microcontrollers within 20 weeks. Students design a digital thermometer, a blood pressure meter, an optical pulse monitor, an EKG, an audio preamplifier, and a class D power amplifier. They also learn how to measure and characterize components including impedance spectroscopy of a loudspeaker and of electrochemical electrodes. Related Links

FAO/INFOODS Food Composition Table for Western Africa (2019) / Table de composition des aliments FAO/INFOODS pour l'Afrique de l'Ouest (2019) Food and Agriculture Organization of the United Nations, 2020-02-20 Food composition data are useful throughout the food system for nutrition-sensitive agriculture, improved processing methods that ensure greater nutrient retention in foods, nutrition labelling, and to inform, educate, and protect consumers through food-based dietary guidelines, nutrition education, and communication and legislation. The FAO INFOODS Food Composition Table for Western Africa (WAFCT) 2019 is an update of the West African Food Composition Table of 2012, which lacked some important components, foods, and recipes. WAFCT 2019 contains almost three times as many food entries and double the number of components with increased overall data quality. Many of the data points from WAFCT 2012 have been replaced with better data, mostly analytical data from Africa, with a special emphasis on Western Africa. These improvements are essential to understanding the nutrient composition of foods in the region and to promoting their appropriate use. WAFCT 2019 is the result of four years of collaboration among INFOODS network researchers in Africa and the Nutrition and Food Systems Division of FAO and was developed as part of the International Dietary Data Expansion (INDDEX) Project implemented by Tufts University's Gerald J. and Dorothy R. Friedman School of Nutrition Science and Policy, with funding from the Bill & Melinda Gates Foundation. These new data from WAFCT
