Western Journal of Education, 1928 **The High School Teacher**, 1927 **Scientists and Engineers in the Federal Government, October 1958** National Science Foundation (U.S.), 1961 *Report of the Board of Commissioners of the Academy and Union Schools, Owego, Tioga County, N.Y.* Owego (N.Y.) Board of Commissioners of the Academy and Union Schools, 1891 School Devices Edward Richard Shaw, Webb Donnell, 1886 The Public Understanding of Assessment John Gardner, 2017-10-02

Assessment of educational achievement whether by traditional examinations or by teachers in schools attracts considerable public interest particularly when it is associated with high stakes outcomes such as university entry or selection for employment When the individual's results do not chime with their or their teachers' expectations doubts creep in about the process of assessment that has arrived at this result However educational assessment is made up of many layers of complexity which are not always clear to the general public including teachers students and parents and which are not easily understood outside of the expert assessment community These layers may be organized in highly co dependent relationships that include reliability validity human judgment and errors and the uses and interpretations of the various types of assessment No one could reasonably argue that the principles and complexities of educational assessment should be core learning in public education but there is a growing realization that trust in the UK assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year This book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment and how this understanding may be improved This book was originally published as a special issue of the Oxford Review of Education *Scientific and Technical Personnel in the Federal Government*, 1968 Scientific, Technical and Health Personnel in the Federal Government National Science Foundation (U.S.), 1969 **Geographies of Writing** Nedra Reynolds, 2007-09-03

Twenty first century technological innovations have revolutionized the way we experience space causing an increased sense of fragmentation danger and placelessness In *Geographies of Writing Inhabiting Places and Encountering Difference* Nedra Reynolds addresses these problems in the context of higher education arguing that theories of writing and rhetoric must engage the metaphorical implications of place without ignoring materiality *Geographies of Writing* makes three closely related contributions one theoretical to reimagine composing as spatial material and visual one political to understand the sociospatial construction of difference and one pedagogical to teach writing as a set of spatial practices Aided by seven maps and illustrations that reinforce the book's visual rhetoric *Geographies of Writing* shows how composition tasks and electronic space function as conduits for navigating reality **Research on the Balance of Educational Resources Allocation and Spatial Layout** Li Ran, 2023-09-22

Based on the spatial perspective this book takes the urban area of Xi'an China as the main research region and studies the balance of resource allocation focusing on educational resources and school layout The author constructs a mathematical model to

measure the level and types of resource allocation and regional differences in primary schools and uses GIS spatial analysis to explore the efficiency and fairness of school spatial layout The book suggests a better way for the balanced development of basic education in Xi an city It also provides theoretical foundations analytical methods and empirical support for the study of balanced public resource management in public service urban planning and urban geography This book is suitable for students and scholars of tourism management regional planning facilities and urban management and those interested in resource allocation in Chinese urban areas in general
