Explaining International Production Routledge Revivals:

Explaining International Production (Routledge Revivals) John H. Dunning, 2014-11-13 John Dunning's general theory of international production first propounded in the late 1970s has generated considerable debate. This work thoughtfully reassesses the paradigm and extends the analysis to embrace issues of theoretical and empirical importance. In a collection of essays the changing characteristics of international production are examined and an interdisciplinary approach suggested for understanding the multinational enterprise in the world economy. This book first published in 1988 will be of value not only to economists and international business analysts but to scholars in other fields notably organizational marketing and management specialists.

The Globalization of Business (Routledge Revivals) John H. Dunning, 2014-11-13 In recent years economic activity has become increasingly globalized. One of the main instruments behind this process is the multinational enterprise. In *The Globalization of Business* first published in 1993 John Dunning explores the latest issues in the world of international business and looks ahead at the remaining years of this century identifying the likely challenges of the future. What are the challenges posed by the technological, political and economic developments of the 1990s for international business? What are the implications of the opening up of new territories such as in Central and Eastern Europe and parts of China? To what extent are the competitive advantages of nation states increasingly coming to depend on the presence of multinational activity? What are the implications of the globalization of markets and production for the domestic economic policies of governments? This collection of essays will be vital reading to students of international business.

Coalitions and Competition (Routledge Revivals) Yair Aharoni, 2014-06-17 This title first published in 1993 was one of the first books to analyse the forces behind the increasing globalization of professional business services. Based on contributions from leading authorities in international business both academics and members of organizations such as GATT and UNCTAD it looks at the opportunities for growth, environmental and regulatory problems and the major problems of managing the international expansion of professional firms. Crucially it discusses such issues from the point of view of managers of such organizations and the role of governments in negotiating multinational agreements. This highly international and timely reissue will be of interest to students of international business as well as managers of professional business firms and policy makers involved in international trade issues.

International Management Manfred Fuchs, 2022-10-26 This textbook for students and practitioners offers answers to the most important questions and challenges of international management. The main topics are presented and discussed on three levels: a) the macroeconomic and institutional environment of the global economy; b) the international firms embedded as players in this environment; and c) the actual management decisions. The focus is placed both on the characteristics of the individual subject areas: macro, meso and microperspective and on the interdependent connections between these areas. The main interest of this book lies in an application oriented analysis of the central strategic management decisions in internationalizing companies. This textbook has
