Prideaux, Gianna Moscardo, Eric Laws, 2006-09-14 The aim of this book is to enhance theoretical and practical understanding of quality management in tourism and hospitality It provides a benchmark of current knowledge and examines the range of research methods being applied to further develop tourism and hospitality service management research It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area **Bulletin of the Atomic Scientists**, 1996-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Instructional Technology Research, Design and Development: Lessons from the Field** Alias, Nor Aziah, 2011-11-30 Design and development research which has considerable implications for instructional design focuses on designing and exploring products artifacts and models as well as programs activity and curricula Instructional Technology Research Design and Development Lessons from the Field is a practical text on design and development research in the field of instructional technology This book gives readers an overview of design and development research and how it is conducted in different contexts and for various purposes Further this reference source provides readers with practical knowledge on design and development research gained through investigation of lessons learned in the field *Greece's (un) Competitive Capitalism and the Economic Crisis* Spyros Sakellariopoulos, 2019-05-15 This book reviews the profound transformation to the Greek political economy in recent years and considers the reasons that have led to this transformation Further the author explores the social experimentation and social diversity that evolved as a result of the Greek and international economic crises By challenging various assumptions made about the crisis the author sheds light on Greek social relations and the country's particular type of capitalist development This book will be of value to both economists and sociologists linking discussions about social class with economic political and institutional analyses *Terrorism in American Memory* Marita Sturken, 2022-01-18 The role of cultural memory in American identity *Terrorism in American Memory* argues that the terrorist attacks of 9 11 and all that followed in its wake were the primary force shaping United States politics and culture in the post 9 11 era Marita Sturken maintains that during the past two decades when the

country was subjected to terrorist attacks and promulgated ongoing wars of aggression we have veered into increasingly polarized factions and been extraordinarily preoccupied with memorialization and the politics of memory The post 9 11 era began with a hunger for memorialization and it ended with massive protests over police brutality that demanded the destruction of historical monuments honoring racist historical figures Sturken argues that memory is both the battleground and the site for negotiations of national identity because it is a field through which the past is experienced in the present The paradox of these last two decades is that it gave rise to an era of intensely nationalistic politics in response to global terrorism at the same time that it released the containment of the ghosts of terrorism embedded within US history And within that disruption new stories emerged new memories were unearthed and the story of the nation is being rewritten For these reasons this book argues that the post 9 11 era has come to an end and we are now in a new still undefined era with new priorities and national demands An era preoccupied with memory thus begins with the memorial projects of 9 11 and ends with the radical intervention of the National Memorial for Peace and Justice informally known as the Lynching Memorial in Montgomery Alabama a project that unlike the nationalistic 9 11 Memorial and Museum in New York dramatically rewrites the national script of American history Woven within analyses of memorialization memorials memory museums art projects on memory and architectural projects is a discussion about design and architecture the increased creation of memorials as experiences and the role of architecture as national symbolism and renewal Terrorism in American Memory sheds light on the struggles over who is memorialized who is forgotten and what that politics of memory reveals about the United States as an imaginary and a nation
