Gauteng Trial Paper 2014:

Mathematics Teaching and Professional Learning in sub-Sahara Africa Kakoma Luneta, 2021-12-09 The book represents a crop of wide ranging research conducted by renowned scholars in sub-Saharan Africa revolving around mathematics teaching and professional development programs for mathematics teachers. The research-based proposals and actual how to conduct professional development initiatives that enhance effective mathematics instruction are rooted in teacher input and informed by learners' errors and misconceptions. The book provides a comprehensive snapshot on mathematics teaching, learning and effective professional development programmes for mathematics teachers in sub-Saharan Africa. It is the only research output that advances and disseminates issues of mathematics education and research in the region with input from South Africa, Kenya, Rwanda, Uganda, Malawi, Namibia, Lesotho, Ethiopia and Zimbabwe.

After Dictatorship Peter Hoeres, Hubertus Knabe, 2023-02-20 Numerous studies concerning transitional justice exist. However, comparatively speaking, the effects actually achieved by measures for coming to terms with dictatorships have seldom been investigated. There is an even greater lack of transnational analyses. This volume contributes to closing this gap in research. To this end, it analyses processes of coming to terms with the past in seven countries with different experiences of violence and dictatorship. Experts have drawn up detailed studies on transitional justice in Albania, Argentina, Ethiopia, Chile, Rwanda, South Africa and Uruguay. Their analyses constitute the empirical material for a comparative study of the impact of measures introduced within the context of transitional justice. It becomes clear that there is no sure formula for dealing with dictatorships. Successes and deficits alike can be observed in relation to the individual instruments of transitional justice, from criminal prosecution to victim compensation. Nevertheless, the South American states perform much better than those on the African continent. This depends less on the instruments used than on political and social factors. Consequently, strategies of transitional justice should focus more closely on these contextual factors.

Glimpses into Primary School Teacher Education in South Africa Sarah Gravett, Elizabeth Henning, 2020-11-05 This book explores the current landscape of Initial Teacher Education (ITE) in primary schools in South Africa. Considering recent policy directives and initiatives, it highlights the dilemmas of ITE for the primary school and gives a thorough account of innovations and initiatives to improve ITE. The book presents what works best for quality preparation of teachers in the Global South where many children rely on their teachers and school life to break the cycle of poverty. Chapters draw on evidence from workplace learning, pre-service study and primary school teacher education policy to highlight examples of promising change in teacher education in South Africa, addressing the clichés of theory versus practice head-on. This book successfully brings out the challenging aspects of teacher education for childhood learning, which has otherwise been regarded as the softer option for a career in education. This book will be of great interest for academics, researchers and postgraduate students in the fields of teacher education, African education, educational policy, international education and comparative education.

South Africa's Insurgent Citizens Doctor Julian Brown, 2015-07-15

Twenty years on from South Africa's first democratic election the post apartheid political order is more fractured and more fractious than ever before. Police violence seems the order of the day whether in response to a protest in Ficksburg or a public meeting outside a mine in Marikana. For many this has signalled the end of the South African dream. Politics they declare is the preserve of the corrupt, the self interested, the incompetent and the violent. They are wrong. Julian Brown argues that a new kind of politics can be seen on the streets and in the courtrooms of the country. This politics is made by a new kind of citizen, one that is neither respectful nor passive but instead insurgent. The collapse of the dream of a consensus politics is not a cause for despair. South Africa's political order is fractured and in its cracks new forms of activity, new leaders and new movements are emerging.

Afterimages of Apartheid Kylie Thomas, 2025-10-29. *Afterimages of Apartheid* shows how photographs of the past can be mobilised as a critical tool for understanding the ongoing effects of apartheid in contemporary South Africa. Through close readings of significant images made during and after apartheid the book shows how photography works as a means of documentation, commemoration and resistance. Written by one of South Africa's leading scholars of visual history the book considers the ways in which photographs can be used to contest impunity for state violence. *Afterimages* includes chapters on the Sharpeville and Marikana massacres, on the re opening of cases of human rights violations that remain unresolved in the aftermath of the South African Truth and Reconciliation Commission and on contemporary protests against the post apartheid state. The book makes a powerful case for the role of photographs in drawing the viewer into the past, time they represent, issuing a call to the living to remember, respond and react. This vivid account of the photography of apartheid will be of interest to students and researchers across the fields of South African history, visual studies, memory studies, art history, photography studies and transitional justice.

Capitalism and Economic Crime in Africa Jörg Wiegatz, 2024-06-21. This book offers a comprehensive analysis of economic crimes and market irregularities including matters of trickery, parallel economy, illicit trade, economies of violence and criminalisation of the poor in neoliberal Africa. It investigates economic crime as a phenomenon of neoliberal reform and transformation and it unpacks crime as a societal and particularly as a political economic phenomenon under capitalism. The book brings together a collection of research articles, briefings and updated blog posts that were published over a period of nearly 40 years, 1986-2023, in the acclaimed journal *Review of African Political Economy* (ROAPE) and on its website roape.net. Featuring contributions from leading experts in the field including a foreword by Yusuf K. Serunkuma and an afterword by Lauren Snider, this volume explores what these crimes have to do with and can tell us about state-business relations, regulation, capitalist transformation and the corporation on the continent, shedding light on the co-production of the crimes by a range of actors from the realms of business, politics, state and international development, including major reform advocates such as international financial institutions (IFIs) and other donors. It responds to the imperative to advance the analysis of the link between capitalism and crime in Africa and to locate capitalism more centrally in the analysis of economic crimes as more

African countries move from being societies with capitalism to capitalist societies Illustrating the relevance of African countries to debates in criminology corporate crime state crime crimes of the powerful and illegality this volume engages with and mobilises a variety of literatures to analyse economic crimes as phenomena of global and local capitalism and provides readers from academia government business media civil society and education a striking source of information and analysis

Identification and Citizenship in Africa Séverine Awenengo Dalberto, Richard Banégas, 2021-05-09 In the context of a global biometric turn this book investigates processes of legal identification in Africa from below asking what this means for the relationship between citizens and the state Almost half of the population of the African continent is thought to lack a legal identity and many states see biometric technology as a reliable and efficient solution to the problem However this book shows that biometrics far from securing identities and avoiding fraud or political distrust can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging It highlights the social and political embedding of legal identities and the resilience of the documentary state Drawing on empirical research conducted across 14 countries the book documents the processes practices and meanings of legal identification in Africa from the 1950s right up to the biometric boom Beyond the classic opposition between surveillance and recognition it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work the practices of citizenship and the role of bureaucracy in the writing of the self in African societies This book will be of an important reference for students and scholars of African studies politics human security and anthropology and the sociology of the state

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present

conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
