efforts are centered upon the creation of learning systems capable of improving recognition performance on the basis of past experience. The majority of the work in the third direction is devoted to the study of the basic structure of complex patterns, the construction of mathematical models for pattern recognition and the analysis of complex pictorial representations. The author elucidates the heuristics approach and the science approach to pattern recognition problems. This chapter together with Chapter 2 of this volume supplements the chapter on Engineering Principles of Pattern Recognition in Volume 1 to provide a more complete treatment of this subject.
