Green, Andrea Carlson Gielen, Judith M. Ottoson, Darleen V. Peterson, Marshall W. Kreuter, 2022-02-08. A time-tested landmark approach to health promotion and communication projects and everything that goes into making them successful. For more than 40 years, the PRECEDE PROCEED model developed in the early 1970s by Lawrence W. Green and first published as a text in 1980 with Marshall W. Kreuter, Sigrid G. Deeds, and Kay B. Partridge has been effectively applied worldwide to address a broad range of health issues, risk factors like tobacco and lack of exercise, social determinants of health such as lack of access to transportation and safe housing, and major disease challenges like heart disease and guinea worm disease. In Health Program Planning, Implementation, and Evaluation, Green and his team of senior editors and chapter authors combine their expertise to offer a high-level guide to public health programming. This guide aligns with foundational public health competencies required by increasingly rigorous certification and accreditation standards. Driven by the coronavirus pandemic and a looming climate crisis, the book addresses the rapid changes in modern-day conceptions of disease prevention and health promotion. Today's public health practitioners and researchers are often called upon to address a complex web of factors including population inequities that influence health status from biology to social and structural determinants. Program and policy solutions to population health challenges require systematic planning, implementation, and evaluation. Providing students with knowledge, skills, and a range of tools, the book recognizes new approaches to communication and fresh methods for reaching a greater diversity of communities. The authors highlight the importance of starting the population health planning process with an inclusive assessment of the social needs and quality of

life concerns of the community They explain how to assess health problems systematically in epidemiological terms and address the behavioral and environmental determinants of the most important and changeable health problems They also cover procedures for assessing and developing the capacity of communities and organizations to implement and evaluate programs Drawing on more than 1 200 published applications of the PRECEDE PROCEED model Health Program Planning Implementation and Evaluation features numerous case studies and contributions from internationally recognized experts including governmental academic and community public health leaders giving readers a thorough and well rounded view of the subject Ultimately it is an up to date powerhouse for community and global health promotion at all levels Contributors Faten Ben Abdelaziz John P Allegrante Patricia Chalela Cam Escoffery Maria E Fernandez Jonathan E Fielding Robert S Gold Shelly Golden Holly Hunt Vanya C Jones Michelle C Kegler Gerjo Kok Lloyd J Kolbe Chris Y Lovato Rodney Lyn Guy Parcel Janey C Peterson Nico Pronk Amelie G Ramirez Paul Terry
