Review of the Electrical Communication Laboratories Denki Tsūshin Kenkyūjo (Japan),1973 Consists of abstracts of various of the Laboratory's journals

First USA-Japan Computer Conference Proceedings,1972

The Role of Research in Teachers' Work Lesley Scanlon,2018-01-29 In the debate regarding what constitutes teachers work academics and bureaucrats continue to speak for teachers with teachers voices rarely heard and not accorded equal recognition The Role of Research in Teachers Work addresses this imbalance by privileging teachers voices as they narrate their experiences of engaging in systematic inquiry The book embeds the teacher narratives within the scholarly debates about the nature of knowledge and the nature of professional practice Scanlon examines the knowledge teachers create through their research and how that knowledge is perceived by others within the school community This book can be read as a companion volume to Scanlon's 2015 Routledge publication *My School* or as a standalone exploration of teachers own narratives of engaging in action research Together these two books are unique in contemporary writing on schools representing one of the only comprehensive longitudinal studies of a low socioeconomic secondary school from the perspective of those who learn and teach therein This book enables teachers to be part of the scholarly conversation about their work and the place of research in that work As such it should be essential reading for academics teacher educators and postgraduates in the field of education It should also be of interest to policymakers and teachers

Understanding Student Participation and Choice in Science and Technology Education Ellen Karoline Henriksen,Justin Dillon,Jim Ryder,2014-09-17 Drawing on data generated by the EU's Interests and Recruitment in Science IRIS project this volume examines the issue of young people's participation in science technology engineering and mathematics education With an especial focus on female participation the chapters offer analysis deploying varied theoretical frameworks including sociology social psychology and gender studies The material also includes reviews of relevant research in science education and summaries of empirical data concerning student choices in STEM disciplines in five European countries Featuring both quantitative and qualitative analyses the book makes a substantial contribution to the developing theoretical agenda in STEM education It augments available empirical data and identifies strategies in policy making that could lead to improved participation and gender balance in STEM disciplines The majority of the chapter authors are IRIS project members with additional chapters written by specially invited contributors The book provides researchers and policy makers alike with a comprehensive and authoritative exploration of the core issues in STEM educational participation
