Our Right to Drugs Thomas Szasz, 1996-04-01 In *Our Right to Drugs* Szasz shows how the present drug war started at the beginning of this century when the US government first assumed the task of protecting people from patent medicines By the end of World

War I the free market in drugs was but a dim memory Instead of dwelling on the familiar impracticality and unfairness of drug laws Szasz demonstrates the deleterious effects of prescription laws which place people under lifelong medical supervision The result is that most Americans today prefer a coercive and corrupt command drug economy to a free market in drugs Szasz stresses the consequences of the fateful transformation of the central aim of US drug prohibitions from protecting the public from being fooled by mis branded drugs to protecting them from harming themselves by self medication He emphasises that a free society cannot endure if the state treats adults as if they were truant children and if its citizens reject the values of self discipline and personal responsibility After discussing the racial aspects of drug prohibition eg drug enforcers are far more likely to accost blacks than whites Szasz suggests a connection between drug prohibition and the personal dread of the availability of an easy and pleasurable way to commit suicide

From Hiroshima to Fukushima to You Dale Dewar, Florian Oelck, 2014-05-15 The bombing of Hiroshima on August 6 1945 brought radiation to international attention but the exact nature of what had been unleashed was still unclear to most The 1986 meltdown at the Chernobyl nuclear plant again made headlines with estimates of fatalities ranging from 4 000 to almost one million deaths By the time of the shocking 2011 disaster at the Fukushima nuclear plant social media meant governments and corporations no longer had a monopoly over

the release of information but transparency remains low on the agenda Meanwhile few physicians give thought to the delayed health effects of radiation It has been the bold physician who has challenged the potential overuse of chest X rays CT scanning or PET scans This book provides clear and accurate information about radiation so that we can all make informed choices In clear language it offers answers to citizens questions What is radiation Where do we encounter it What are the benefits and risks How do we develop a responsible future around the uses and abuses of radioactivity *Science Versus Practice* Robert Bud, Gerrylynn K. God After Darwin John F. Haught, 2018-05-04 In *God After Darwin* eminent theologian John F Haught argues that the ongoing debate between Darwinian evolutionists and Christian apologists is fundamentally misdirected Both sides persist in focusing on an explanation of underlying design and order in the universe Haught suggests that what is lacking in both of these competing ideologies is the notion of novelty a necessary component of evolution and the essence of the unfolding of the divine mystery He argues that Darwin's disturbing picture of life instead of being hostile to religion as scientific skeptics and many believers have thought it to be actually provides a most fertile setting for mature reflection on the idea of God Solidly grounded in scholarship Haught's explanation of the relationship between theology and evolution is both accessible and engaging The second edition of *God After Darwin* features an entirely new chapter on the ongoing controversial debate between intelligent design and evolution including an assessment of Haught's experience as an expert witness in the landmark case of *Kitzmiller v Dover Area School District* on teaching evolution and intelligent design in schools

Dinosaurs: Marvels of God's Design Dr. Tim Clarey, 2015-10-23 This book fills a critical need for sound science about dinosaurs from a biblical viewpoint focusing on the five major dinosaur groups Dinosaurs are in the news every day as well as viewed in museums and on science channels Unfortunately these portrayals always push an evolutionary agenda This book counters those arguments with solid accurate and biblically based science Explains the latest findings in dinosaur biology behavior extinction and more Covers the complete spectrum of dinosaur related topics from the earliest dinosaur discoveries to debate over why they went extinct Provides a visually stunning dynamic exploration into the history of dinosaurs through the most current discoveries few have seen before Because of secular books and television shows many Christians have struggled to explain how dinosaurs fit in the biblical timeline The word dinosaur is not found in the Bible which has caused some well meaning Christians to turn to secular science for explanations including more speculation than actual fact Unfortunately this misdirection has caused many people to lose faith in the Bible especially the young generation This book will restore faith in the Word of God as it connects the Bible with science Read and discover how dinosaurs are part of God's creative glory

Morbid Appearances Russell C. Maulitz, Russell Charles Maulitz, 2002-07-18 A detailed account of the rise of pathological anatomy in France and England

Constructive Evolution Michael Chapman, 1988-06-24 This book represents an attempt to understand the evolution of Jean Piaget's basic ideas in the context of his own intellectual development Piaget sought to elucidate human knowledge by studying its origins and development In

this book Michael Chapman applies the same method to Piaget's own thinking Dr Chapman shows that some of the Swiss psychologist's essential ideas originated in adolescent philosophical speculations about the relation between science and value These same ideas were then developed step by step in Piaget's investigations of children's cognitive development Dr Chapman claims that Piaget's use of developmental psychology as a means for addressing questions about the evolution of knowledge has been misunderstood by psychologists approaching his work exclusively from the perspectives of their own discipline Reconstructing Piaget's intellectual biography makes possible a better understanding of the questions he originally posed and the answers he subsequently provided Dr Chapman concludes with an assessment of Piaget's relevance for contemporary psychology and philosophy and suggests ways in which Piagetian theory might be further developed

Survival of the Beautiful David Rothenberg, 2013-01-01 The peacock's tail makes me sick said Charles Darwin That's because the theory of evolution as adaptation can't explain why nature is so beautiful It took the concept of sexual selection for Darwin to explain that a process that has more to do with aesthetic taste than adaptive fitness Survival of the Beautiful is a revolutionary new examination of the interplay of beauty art and culture in evolution Taking inspiration from Darwin's observation that animals have a natural aesthetic sense philosopher and musician David Rothenberg probes why animals humans included have an innate appreciation for beauty and why nature is indeed beautiful **Fatal Freedom** Thomas Szasz, 2002-08-01 Fatal Freedom is an eloquent defense of every individual's right to choose for a voluntary death By maintaining statutes that determine that voluntary death is not legal Thomas Szasz believes that our society is forfeiting one of its basic freedoms and causing the psychiatric medical establishment to treat individuals in a manner that is disturbingly inhumane Society's penchant for defining behavior it terms objectionable as a disease has created a psychiatric establishment that exerts far too much influence over how and when we choose to die In a compelling argument that clearly and intelligently addresses one of the most significant ethical issues of our time Szasz compares suicide to other practices that historically began as sins became crimes and now are seen as mental illnesses

Networked Regionalism as Conflict Management Anna Ohanyan, 2015-04-15 Most regions of the world are plagued by conflicts that are made insoluble by a confluence of complex threads from history geography politics and culture These frozen conflicts defy conflict management interventions by both internal and external agents and institutions Worse they constantly threaten to extend beyond their local geographies as in the terrorist bombings in Boston by ethnic Chechens or to escalate from skirmishes to full scale war as in Nagorno Karabakh Consequently such conflicts cry out for alternative approaches to the classic state focused and sovereignty based conflict management models that are practiced in traditional diplomacy which most often produce rather short term ad hoc fragmented interventions and outcomes Drawing upon the cases of the South Caucasus the Western Balkans Central America South East Asia and Northern Ireland Networked Regionalism as Conflict Management offers a theoretical and practical solution to this impasse by arguing for regional collective interventions that involve a long

term reengineering of existing conflict management infrastructure on the ground. Such approaches have been attracting the attention of scholars and practitioners alike yet thus far these concepts have rarely involved more than simple prescriptions for regional cooperation between grassroots actors and traditional diplomacy. Specifically says Anna Ohanyan only the cultivation and establishment of regional peace systems can provide an effective path toward conflict management in these standoffs in such intractably divided regions.

Going Against the Flow Alan M. Laibelman, 2004. Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought. Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation. Building upon a metaphysical scheme first explicated in *The Other Perennial Philosophy: A Metaphysical Dialectic*, Alan M. Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components.
